# Premier & Vivian go Places and See Things

Brownlee Admits Taking Her on Late Evening Drives; a Little Harmless Kissing; Entertains Her at His Home While Family is Away. Vivian Acts the Good Samaritan When Premier Was Indisposed in bed - - Rubs His Back with Alcohol, and Performs Other Friendly Tasks

## Conservative Women Want M. P.'s With Good Morals

Sponsors of the Convention were well pleased with the large and enthusiastic number of Conservative women who gathered from all points along the line and who showed by their keen interest, that although disappointed at the results of recent elections in Ontario and Saskatchewan, they are not discouraged, and will maintain their faith in the Conservative banner. Approximately 250 people were present, the largest representation being from Edmonton.

Mrs. J. P. Simpson, President of the Women's Conservative Club at Sylvan Lake, presided. Mrs. T. D. Fitzsimons of Edmonton, read greetings wired from Premier R. B. Bennett, Hon. D. M. Duggan, A. U. G. Dury, and Edmonton Conservative Club, and also welcomed the large delegation. The necessity of getting voters to the poll was stressed in an address by Don Ramsey, President of the Young Men's Conservative Club, Edmonton.

Confidence in the Hon. Mr. Duggan was expressed by Mrs. P. S. Woodhall, President of the Association, Calgary, who in a forceful, convincing address, urged the women to study the questions of the day, to stand side by side with their men to obtain the best legislation and the best legislation possible.

"We are not discouraged with the result of the vote in Saskatchewan and Ontario," said Mrs. A. C. Stewart, President of the Association in Manitoba, and of the Women's Club in Winnipeg, as she brought greetings from the women of Manitoba.

Mrs. A. G. Ayres, President in Red Deer, told of the keen interest and the work being done by her association, and urged the women to use their influence for a government whose members have a high standard of morality.

The value of liberty, justice and equity to the individual was emphasized by A. G. Steel, Sylvan Lake, and those he felt, especially "equity" would only be obtainable when a Provincial Conservative government came into power. He expressed astonishment that the Premier permitted to be printed in their papers letters whose content was too futile for intelligent readers. Mother's opinions were likely to be taken on opinions, said Mrs. Steele, and asked the women to use their influence upon the young generation who will be voters at the next election.

More had been given to beneficial legislation by the small number of Conservatives than by any other ten men in the House at Edmonton, was the belief of W. E. Payne, local member, Red Deer. Neither the Province nor the Conservative party had a fair chance because the party had never had governing power in Alberta. He felt that the Ontario defect would enable the party to win the ship of a "State of barnacles" and bring it up to the high standard which is the ideal of Conservatism. Both the Premier and the Party were alive to the needs of the present day, stated Mr. Payne, and at the next election he believed a platform would be presented which would meet all expectations and be void of empty words and promises.

It is expected that Women's Clubs will be formed at Lacombe and other points as a result of certain efforts of leaders attending the Conservative Women's Convention held at Sylvan Lake on Wednesday, June 20th.

Mr. and Mrs. James Wright left Tuesday morning on an extended visit to friends and relatives in Ontario.

**Central Alberta Wool Grower's Association**  
 Lacombe, Alta., June 20, 1934

We will receive wool for shipment as follows:

Wetaskiwin, Freight Sheds, July 9th.  
 Red Deer, Freight Sheds, July 10th.  
 Ponoka, Freight Sheds, July 11th.  
 Lacombe, Freight Sheds, July 12 & 13.

D. F. CHISHOLM, Secretary

## MAIL ORDER HOUSES MEAN CHEAP FARM PRODUCTS

Ottawa, June 19.—Picture of men, women and children working in their homes on cheap clothing in the Province of Quebec was painted Thursday to the parliamentary mass buying committee by J. G. Gibson, an investigating auditor.

"This is almost unbelievable," said Chairman H. H. Stevens, when the auditor told of clothing contractors in Montreal trucking cloth and thread into the country, there to be sewed into clothing at starvation rates. Whole families would work, receiving 60¢ a dozen for sewing men's pants, and in addition, buying the thread from the contractor, who received it free from the manufacturer.

The auditor told of waiting one farm house 35 or 40 miles from Montreal, where four families worked together on clothing. In the day time, the women worked the machines, sewing the pieces together, putting in pockets and attaching buttons. At night, the men pressed the finished garments.

The joint output for the four families mentioned was from two and a half to three dozen daily, for which they received, without considering cost of thread, from \$1.40 to \$1.00. Each family would receive less than 50¢ for the long days work.

"We are back in medieval times," commented Sam Factor, Lib., Toronto, adding the whole clothing industry in Canada was being ruined by cheap competition.

Sweatshop labor and home-work conditions had grown in the last four or five years, the chairman said, aggravated by the demand for cheap clothing in the United States, where the mail order houses, and the investigation shows that the goods you think you are getting at a bargain are being sold to you at a profit of from 150 to 350 per cent. by the mail order houses, who are cheating out of all farm products, and the investigation shows that the goods you think you are getting at a bargain are being sold to you at a profit of from 150 to 350 per cent. by the mail order houses, who are cheating out of all farm products, and the investigation shows that the goods you think you are getting at a bargain are being sold to you at a profit of from 150 to 350 per cent. by the mail order houses, who are cheating out of all farm products.

How can our farmers expect people living under the conditions shown above to buy flour and other necessities grown on the farm? Money sent to the mail order houses means cheating out of all farm products, and the investigation shows that the goods you think you are getting at a bargain are being sold to you at a profit of from 150 to 350 per cent. by the mail order houses, who are cheating out of all farm products.

## BLINDMAN VALLEY STAGES

A new daily bus service has been inaugurated between Lacombe and Rimbey. Buses leave Lacombe for Rimbey once daily at 8:45 a.m.

Buses will be run to Gull Lake and return 3 times daily, at 11:30 a.m., 7 p.m., 8:45 p.m. Operators of this bus line are capable and experienced drivers and their cars are comfortable. This bus line is a permanent institution and will be run all year round. Buses connect with the Edmonton and Calgary Greyhound buses. Their time table appears in another column. By phoning Mr. P. A. Lock at Sweet's Pharmacy, complete information with regard to rates, times and fares can be obtained. Mr. P. A. Lock and P. A. Cleary are the operators of this line. Special fares to Calgary and Edmonton will be on sale at all points of the Blindman Valley Stage Line.

## W.M.S. MEETING

At their regular meeting held at the home of Mrs. Hugh Reed on Tuesday, June 19th, the W.M.S., decided to hold a social afternoon some time during the third week of July, at the home of Mrs. S. Phillips, this to take the form of a garden party, weather permitting. Each member is to be asked to contribute fifty cents toward the allocation which may be paid in at that time. Members are asked to invite their friends. Devotional exercises were led by Mrs. C. E. Dodd and a synopsis of the book "Behind the Green Curtains" was given by Temperance Conover.

September meeting will be at the home of Mrs. J. N. B. MacDonald.

## SWEATSHOP PAYS UP

Montreal.—Put cheque was yesterday handed to 27 girls in the employ of the Cooper Dress Company here because of failure of Morris Cooperberg, their employer, to comply with the Quebec Women's Minimum Wage Act. Cooperberg was dropped when the Quebec Labor Department announced receipt of an accepted cheque for \$2,544.66 from Cooperberg, covering minimum wage discrepancies for the 27 girls over a period of one year.

## Rimbey and Points West

A frost during the early hours of Sunday proved fatal to the gardens of the Rimbey district. Potatoes, beans and corn were damaged. The wheat and other grains escaped with the exception of low lying fields and ravines.

More than a hundred people gathered at the Home Glen school house on Sunday, June 24th to hear representatives of the Oxford group movement from Edmonton. Those attending from Rimbey report an interesting meeting with fluent speakers on the platform. A similar meeting was held earlier in the day at the Dakota school house.

"The Blindman Valley Stages" is now operating a daily service between Rimbey and main line points with reduced fares and special weekend rates. The Cottage Hotel is the local bus depot.

The ladies of the W.I. took their dramatic group to Glibly last Friday evening and presented "The Spinsters' Convention" to a large and appreciative audience. The performance was followed by a dance, and the proceeds will enlarge the W.I. funds. The ladies of the Institute plan on spending the last week in July holidaying at Sylvan Lake.

The recent work has at the Mt. Auburn cemetery on Saturday, June 23rd was well attended and work outlined early in the season has been completed. A great improvement has been made and much credit is due the local W.I. who sponsored the movement and provided lunch for the workers.

Miss Viola Ellis has been engaged as teacher for the senior grades of Duburgh public school. Miss Ellis is leaving the last of this week for Portland, Oregon, where she has enrolled for a summer course at the University of Oregon.

Reverend W. F. Jermy, Dorells A. McEneaney, J. Donnelly, E. Sheppard and Secretary W. A. Saunders of Blindman, accompanied by their families attended the third annual picnic of the Central Alberta Municipal District Association held at Meridian Bay, Gull Lake, on Saturday, June 23rd. Ten municipalities were officially represented and the assembly numbered more than a hundred.

Mr. Richardson, highway commissioner of the Province, is the sponsor of public works. Mr. P. Farnell, president of the Alberta Municipal Districts Assn., and Mr. W. E. Payne, M.P., from Red Deer were the principal speakers to address the business meeting preceding the picnic. Representatives of several machinery companies were present.

Rimbey's softball team played the Lockhart team at Lockhart on Sunday afternoon and met defeat with a score of 3-2. The baseball nine also lost out when they met the Eckville players in a game Saturday evening. The game was played on the Rimbey diamond and the score was 4-3.

Merle Chaffee, sixteen year old son of Mr. and Mrs. E. Chaffee, who underwent an operation in the Rimbey hospital is reported as out of danger and progressing favorably.

Mr. W. J. Good, resigned his office as president of the tennis club, at a meeting held June 18th. Following a vote of appreciation tendered Mr. Good for his services to the club, the meeting elected Mr. S. Morris to the presidency and Mrs. S. Stokes was chosen to succeed Mr. Morris as Secretary-treasurer.

Manon Fontaine, pharmacologist and pianist from Edmonton was in Rimbey two days last week and was visited by sixty five people of this district at the rate of \$1.00 per person.

Rimbey's annual sports day is fixed for July 2nd with a full program followed by a picture show and dance in the evening.

## AT THE AVALON

Double feature, Zane Grey's "The Last Roundup" and "Hollywood Spectacle".

Coming: Norma Shearer in "Smiling Thru". This is Mrs. Shearer's finest picture. Note we are playing it on Monday, Tuesday, Wednesday, July 2, 3 and 4.

## BIG TENT EDITORS

Canada's financial, commercial and industrial "leaders" are not dissimilar to the "Big Shots" of the United States. Across the line the racksteers have seized this infamous practice. In Canada there has been too much manifestation of practices that are equally evil, but that are cloaked with the mantle of legality or near-legality.

Over there robbery is committed at the point of the gun. Over here robbery is committed through mass buying, chain store intimidation, starvation wages, and phonetic or synthetic advertising.

It is depressing to note how the untrammeled press of Canada, the so-called independent papers, grossly published to express the people's views and printed in the people's interests, preserve a discreet instructed silence, regarding the betrayal of their subscribers. If the primary producers or the labor unions were to "pull the rough stuff" that has been exposed by the Stevens committee, every big day in the country would be horrified whereas at the moment they are only stupefied. They would attack the culprits demanding the high, the middle and the low justice, with the rack, the thumbscrew and the pillory thrown in for good measure.

The primary producers are not tied into the big newspapers by golf associations, by social affiliations, by club highlights, by fat advertising contracts, nor by interlocking selfish interests. No, he is fair game. He is under suspicion. He enjoys no close season. He has no one to speak for him. But if the "Big Shots" and their lackeys are exposed into the news columns by the fact hunting Stevens committee, then a black blanket of silence falls over the editorial page.

It is tragic. Big time editors act just like small boys whose faces are covered with forbidden jam, but who fondly hope the betraying mess cannot be seen. It is a sad travesty on Canadian journalism that the Big Time editors are indefinitely remote from the people who make up this Canada of ours. They do not know their Canada, nor their Canadians.

It is the people who make a country—not the geography and certainly not the Big Interests, no matter how many millions they own or control. Power centres in the people, the Big Tent Editors, grossly under-rate the intelligence and the perspicacity of the people of Canada. When it suits certain purposes, they are fairly bursting with destructive criticism and lamely lacking in analytical constructive force. Fire and enthusiasm and even

earnest purpose are notably absent from their articles. They have fine lines of invective and shoddy cynicism but no rollicking humor. But their worst blunder lies in their philosophy that they fool their readers. They would reorganize all their processes of thinking were they to take two months every year and mix inognito with their fellow-Canadians.

They are brainy, uncommonly so, in an academic way, but they are shy in practical contacts without which they necessarily must lack the capacity to discuss intimately the affairs of the common run of Canadians.

Let a Canadian editor of the Big Time take one-sixth of his working life and mingle with the employed, work in relief camps, tramp the dusty roads toting a "bundle," ride the freights, labor in the harvest fields or in the orchards, wash gravel for gold, test the vicissitudes of the out-of-work and experience the sensation of a gnawing stomach—let an editor really go through life as it is

being lived in Canada today by more than three million wage-slaves, underpaid and old, and then Canada will read editorials that will mean something.

The thunders of silence today reverberates more raucously than if the big dailies actually had the courage to come out into the open and give the Big Shots the grilling they thoroughly deserve and demand even-tempered justice for the spurned-together common people who, in times of election, are the surest, the noblest and the most progressive people on the surface of the sun's well-known satellite.

Ex.

## MASONS ATTEND CHURCH

Eureka Lodge, A.F.A.M., held their annual church parade on Sunday evening, June 24, the service being held in St. Andrew's United Church. Rev. R. B. Layton gave the address, setting forth a high ideal of service to the members. An anthem by the choir and a vocal solo by Miss Florence Reed, A.T.C.M., was much enjoyed.

## The Lure of the Lakes

Music, moonlight, glorious lake breezes, for a period of nine weeks, dispense music on the Assiniboia and Keewatin en route while the vessels pass through the beautiful Georgian Bay, across the northern part of Lake Huron, through the Sault Ste. Marie locks and across to Port William on Lake Superior, a pleasant, lazy and restful journey of 96 hours from Port McNicoll or Sault Ste. Marie.

Facing with courageous mien the terrible ordeal of disclosing her frailties and indignities before a judge and jury, counsel, reporters and the public, Miss Vivian MacMillan who, but a few days ago, had her 22nd birthday, told such a story in the witness box in the Brownlee seduction suit on Monday afternoon as never was told before in the annals of court records or in pages of fiction. She faced the harrowing test with calmness, telling her story with detail and clearness, without passion or any attempt to hide her own humiliation.

She pictured the Premier of Alberta forcing his will upon her in parked autos on country highways, making Sunday morning assignments in the Premier's office in the Parliament buildings, flying into passions of rage when she attempted to deny him or to free herself from the tangled web of lust into which she had been drawn by his pleadings, when a girl of eighteen.

Q. Did Miss Vivian MacMillan at any time make any demand on you for money?

A. No demands.

Q. Did Johnnie Caldwell at any time?

O. I never heard from Vivian MacMillan or Johnnie Caldwell.

Q. Did you ever tell any of the ministers that Johnnie Caldwell had made a demand on you for \$25,000?

A. I never even mentioned that Johnnie Caldwell had made a demand on me for \$25,000.

Q. And it is not a fact?

A. It is not a fact that I said that Johnnie Caldwell had made a demand on me for \$25,000.

The evidence brought out in this case so far is of such a revolting nature that The Western Globe does not think it in the interest of its readers to publish it. It is not fit reading for the home—Alberta's shame should not be broadcast to the world.

Q. Did you ever kiss her when alone?

"I can't be sure," Premier Brownlee replied.

Q. Did you ever kiss her when alone?

"I can't be sure," Premier Brownlee replied.

Q. Did you ever kiss her when alone?

"I can't be sure," Premier Brownlee replied.

Q. Did you ever kiss her when alone?

"I can't be sure," Premier Brownlee replied.

Q. Did you ever kiss her when alone?

"I can't be sure," Premier Brownlee replied.

Q. Did you ever kiss her when alone?

"I can't be sure," Premier Brownlee replied.

Q. Did you ever kiss her when alone?

"I can't be sure," Premier Brownlee replied.

Q. Did you ever kiss her when alone?

"I can't be sure," Premier Brownlee replied.

Q. Did you ever kiss her when alone?

"I can't be sure," Premier Brownlee replied.

Q. Did you ever kiss her when alone?

"I can't be sure," Premier Brownlee replied.

Q. Did you ever kiss her when alone?

"I can't be sure," Premier Brownlee replied.

Q. Did you ever kiss her when alone?

"I can't be sure," Premier Brownlee replied.

Q. Did you ever kiss her when alone?

"I can't be sure," Premier Brownlee replied.

Q. Did you ever kiss her when alone?

"I can't be sure," Premier Brownlee replied.

Q. Did you ever kiss her when alone?

"I can't be sure," Premier Brownlee replied.

Q. Did you ever kiss her when alone?

"I can't be sure," Premier Brownlee replied.

Q. Did you ever kiss her when alone?

"I can't be sure," Premier Brownlee replied.

Q. Did you ever kiss her when alone?

"I can't be sure," Premier Brownlee replied.

Q. Did you ever kiss her when alone?

"I can't be sure," Premier Brownlee replied.

## Thrifty Housewives Buy Quality.

# "REAL" BUTTER TEA

"Fresh from the Gardens"

## That "Bought And Paid For" Idea

There is a curious persistence in the idea current in certain parts of Eastern Canada, that the older provinces of Confederation have proprietary interests in the prairie provinces by "rights of purchase."

Just recently, a storm which ranged West against East, broke in the House of Commons at Ottawa, when relief and other expenditures required by Western Canada were under consideration. During the discussion, the "bought and paid for" mentality was prominently in evidence, according to newspaper speeches. It appears inevitable that, when any expenditure which may be construed as exclusively Western, is mooted in the Federal parliament, some member from one of the older provinces, impelled by the idea, seems bound to object on the ground that the prairie provinces are not entitled to further consideration—and terms such as "blood-suckers" are applied, indiscriminately and with reckless abandon, to governments and people of the West.

Forgotten in the heat of debate is the amazing part which the West has played in the material advancement of the Dominion. Forgotten, for the time being, is the gigantic contribution which the wheat-growing prairies have made to the wealth of Canada. Forgotten are the tremendous expenditures made, by the Dominion as a whole, for works, projects and purposes which may be construed as exclusively Eastern. Forgotten is the use made of the resources of the West in the building of great transportation systems of the whole of Canada. Forgotten is the industrial development of prairie purchasing power upon the industrial development of the East. Forgotten, too, is the fact that the West's present needs are due to the dire extremity of many of its people—a condition they certainly did not seek and did nothing to create. The "right of purchase" idea reigns paramount over all others when tempers are frayed and local zeal is in the ascendency. In one breath it is admitted that the prairie section has contributed more to the wealth of Canada in a specified period than any other component part of the Dominion. In the next, the prairies are branded as "blood-suckers," draining, as it were, the coffers of Canada which, by implication, apparently are filled solely by the contributions made by the older, Eastern provinces.

The idea, of course, has its roots in the historical charter granted by Charles II. of England, in 1670, to the Hudson's Bay Company, which conferred upon that company "rights in the territory tributary to the river flowing into the Hudson Bay"—including property rights and rights of government. These rights the company exercised in the territory known as Rupert's Land for some two hundred years.

When, however, Confederation became an accomplished fact in 1867, the Canadian parliament, pursuant to the great vision of a united Canada stretching from ocean to ocean, initiated negotiations with the Imperial Government at London with a view to acquiring possession of the territory held under this charter by the Hudson's Bay Company. The British Government agreed to the request on condition that the arrangement entered into would not involve expenditure by the Imperial Treasury, and on the further condition that there should be no surrender of territory until the terms had been agreed upon.

Negotiations with the Company proceeded for two years, during which time it held out for a cash payment of \$300,000 (approximately \$1,000,000), as one of the terms under which it was prepared to relinquish its rights in the territory. The Canadian Government, then representing the original provinces of Confederation, borrowed the required sum on bond issues which matured in 1904. The money being paid, the Company surrendered its rights under the charter, and Canada stretched one and indivisible from the Atlantic littoral to the Pacific seaboard. That is the story, that the genesis of this "bought and paid for" idea which crops up, ever and anon, during debate in the Federal parliament.

Obviously, \$1,000,000 is a ridiculously small sum against which to assess a claim of proprietary rights of purchase in the entire prairie section of Canada. It is ridiculously small not only in proportion to the wealth produced normally each year in the farming wheat field of the West. It is ridiculously small not only in proportion to the contribution made by the "purchased" territories to the aggregate wealth of the Dominion. It is ridiculously small in comparison with the annual contributions made by the Western provinces to the revenues of Canada. That the idea should survive at all in the face of recent history is incomprehensible to Western minds. That it should be used to justify opposition to present claims of certain sections of the prairie provinces to the contrary, demonstrates not only the mental poverty of the objector, but a naive ignorance of obvious facts. Recent economic experience has proved that, instead of the East holding the West in fee, the reverse is closer to the truth.

## Italy To Build Battleships

Three Large Fighting Ships To Be Built Under Washington Treaty

Italy will construct three large battleships with general specifications similar to those of the French battleship Duquesne, it was disclosed by naval officials.

The new vessels will be completed by 1940 and will cost about \$85,000,000. Their construction will be in accordance with a program outlined by Premier Mussolini in an address before the chamber in which he stated that Italy proposes to utilize the 70,000 tons allowed Italy under the Washington treaty.

The premier estimated the expenditure will total 1,000,000,000 lire. This capital expenditure will be in addition to appropriations to modernize old battleships between now and 1940.

## Got Past Electric Eye

When they called the roll of prisoners of the Detective Bureau's "escape-proof" jail, George Spina was missing. He had slipped by the "Electric Eye" an apparatus which rings a bell whenever a bit of metal on a prisoner comes near. Detectives said they thought Spina, who weighs 240 pounds, wore rubber heels.

According to a doctor, singing warms the blood. We have heard some that has made ours positively boil.

## Household Drudgery The Bane of a Woman's Life

Nature intended women to be strong and healthy instead of weak and sickly, but how can a woman have good health when she is burdened through household drudgery without any relaxation. It is no wonder she becomes nervous and irritable, has bad flashes, faint and dizzy spells, shortness of breath, sinking and smothering sensations, and can't sleep at night.

Women who are weak and run down will find in Milburn's H. & N. Pills a remedy to strengthen the system and bring back the much desired health.

## Will Meet At Edmonton

Next Annual Conference of Western Rotary For Alberta City

The 20th conference of the four districts of the International Rotary Clubs will be held in Edmonton, the 28th conference at Winnipeg decided. Invitation to the Alberta city was extended by Oliver C. McIntyre, of Edmonton Rotary.

Rotary's status as a world force, its future in Western Canada and the spirit of fellowship on which it was founded were described by speakers at a luncheon presided over by Norris S. Stiles, of Lethbridge, the next governor of the fourth district.

Theodore A. Torgeson, of Estevan, Sask., past district governor, stated "our outlook for the coming year is bright. Perhaps nowhere has the depression covered such a wide area with such intensity as in the fourth district, but there is some improvement in general economic conditions since last spring.

Red Deer, Alta., club was awarded the 100 per cent. meeting attendance shield and another trophy was awarded the Melville, Sask. club for increased attendance.

## World's Largest Flying Boats

Russia Lends With Britain Second And United States Third

Like everything else airplanes are becoming larger and more powerful. The honor of having the biggest goes to Russia.

The Russians have almost completed at Moscow a flying boat—it might be called a flying liner—to be named the "Maksim Kovalev." It will provide accommodation for 70 passengers, and will have a crew of six. It will have a moving picture "auditorium," and a room for developing photographs. The pilot will sit in a conning tower above the wings so that he will have an uninterrupted view.

Great Britain furnishes the second largest, the "Sylla," which is almost ready. It will carry 39 passengers and a crew of five. Among other things it will have a smoking compartment.

The United States comes third with the S-42, built at Bridgeport, Conn., by the Sikorsky Company. It carries 32 passengers and a crew of five. It has a full-load range of 1,200 miles non-stop, and can also carry 1,000 pounds of freight.—St. Thomas Times-Journal.

## Vaccine For Tuberculosis

New Preparation Being Tested On Cattle In Ireland

Experiments to find a cure for tuberculosis in cattle continue in various parts of the empire. The Spahling vaccine, of which much was heard two or three years ago, is still undergoing tests, the most recent of which have been made in Northern Ireland under official auspices. The calves vaccinated with the Spahling vaccine, which survived the injection of heavy doses of tubercle infection and are thriving, while untreated calves have succumbed.

As the United Kingdom is now embarking on a national campaign to clean up her dairy herds and eradicate tuberculosis, the final results of the Ulster trial seem likely to offer an economical and practicable means of immunising dairy cattle against tuberculosis and gradually rid the country of a scourge which is costly to public health and farmers.

## Dwarfs Holding Congress

Likely To Take Place In Budapest Next Year

Fired by the Nazi doctrine of racial purity, dwarfs of Hungary have formed a National Union of Hungarian Dwarfs and have invited all the dwarfs of the world to a Dwarf Congress which is to be held, probably in Budapest, next year. Their creed is to "preserve the purity of the race," to "form a race," to marry with normally-sized people and to demand lower fares and smaller houses for all tiny folk. Their leader, their Hitler, is said to be 30 inches tall.

## Invention For Radio Fans

Dr. Nevil M. Hopkins, of New York University, is the inventor of a new electrical device which he claims will revolutionize the radio broadcasting industry. He calls it the "televote" and by use of this instrument, a listener-in on a broadcast can, by pressing a button, immediately transmit to the station his reaction to the program being presented.

## Has Regular Zoo

Pity the prowler who breaks into the room of Kenneth Johnson, University of California student. Johnson, who aspires to be a zoo keeper, keeps eight snakes, a black widow spider, and a Gila monster in his bedroom. Johnson studies the best way to make them happy, and improve their intelligence by running them through mazes.

Islands in a river, unless caused by rock outcrops, are continually travelling downstream as the current cuts at the upstream end of the island and deposits at the other end.

## "PERSONS NOT FAT LIVE LONGEST"

## Eminent Physician Declares

In a recent lecture before the American Academy of Medicine, a prominent physician stated that persons who aren't fat live the longest.

Common sense confirms this. Insurance companies often reject overweight folks or charge higher premiums on account of the risk. Fat crowds and weakens body organs—it slows you down and puts unnecessary strain on the heart. A host of ailments (even rheumatism, acidity, shortness of breath and lassitude) are often associated with fat.

So get rid of this dangerous, unhealthy fat. There's no reason why you shouldn't, when science has given you this safe, effective treatment—a half teaspoonful of Kruschen Salt in a glass of hot water first thing every morning.

This healthful "little daily dose" of Kruschen keeps the system free from harmful toxins. It helps to re-establish normal and proper body functioning—it keeps you feeling fine and fit all the time. Energetic activity takes the place of sluggish indolence all while you lose excess fat gradually and without discomfort.

## Keeping Invention Secret

Device Would Make Ocean Air Trips Very Cheap

A day trip from London to New York for eight dollars!

A revolution in air transport is imminent if an invention being perfected by J. Anderson, Corry, proves a commercial proposition.

Corry is a well-known inventor and claims to be the first to invent the tank used during the war.

He claims that his device, details of which are at present a closely guarded secret, will increase air speed by at least 45 per cent.

In spite of this great acceleration, the new style aeroplane would consume no more oil and gas than the standard engine at present in use.

"At a cost of \$8 each," Corry said, "as many as 300 passengers could be carried, and the trip would not be unprofitable to the owners of the service. Day excursions to America would at least eight hours in New York."

"The aeroplane would be no 'stunt' machine. It could not 'loop' or do any of the known acrobatics.

"But it would be crash-proof, and, indeed, accident-proof. The invention involves no engine, no propeller, no landing gear, and a change in the position of the aero engine."

## Inspection By King George

Last Time Commissioners Corps Honored Was In 1907

Inspection of the corps of commissioners by the King, at Buckingham Palace on June 10 is only the second instance since the annual inspections were begun in 1868, that the reigning monarch has honored the corps in this way. King Edward VII. carried out the inspection in 1907.

The present King, when Prince of Wales, was the inspecting officer two years later, however, and various members of the royal family have performed the ceremony.

The interest in the corps is an acknowledgment of the fine record of the organization, founded in 1859 by the late Captain Sir Edward Walter, with the intention of providing suitable employment for wounded pensioners of the army and navy.

Then, as now, every member must deposit a minimum sum on joining, and subsequently a minimum sum yearly, in the corps saving bank. In return, the corps guarantees his fidelity to his employer.

## Fouled The Balliffs

Seeing the balliffs, who had been sent by the landlord to serve a summons for Jones, coming down the garden path, Jones barred and locked his door and prepared to hold the fort at all costs.

The balliffs knocked twice, and when there was no response they pushed the summons under the door.

Quick as a thought Jones blew it back again with his bellows.

This happened several times until finally one of the men picked up the summons and said to this companion:

"Come on, let's take it back to the landlord. I wouldn't pay any rent either, if I had to live in a draughty old house like this."

Gasoline sells for 24 cents a gallon in Australia now; a decade or more ago it sold for 84 cents a gallon; even in recent years, the price stood between 50 and 60 cents a gallon.

## Fulfilling Father's Hopes

Captain Scott's Son Makes Study Of Natural History

Twenty-two years ago Captain Scott, one of the greatest English explorers of all time, lay dying in a tent in the Antarctic.

The last letter he wrote was to his wife. He spoke of their infant son Peter. "Make the boy interested in natural history if you can," he said.

"It is far better than games," Peter Scott is 24 now. He has fulfilled his father's hopes. Recently he opened in Bond street, London, his second exhibition of paintings of wild life.

The grey light of dawn is there; so are the mudflats, the almsous creeks, the ebb of the tide, and eerie, plaintive noises. The curlew calls; you can hear the piping of awakening redshank and stint. Grey geese rise V-shaped into the sky and alight shoreward to the fresh marshes of the mainland.

It is a world of thrills to the mere wildflower. It is a world of exquisite joy to the widower-naturalist, which is what Peter Scott has become.

He shoots little now, as he said recently, but night and day, the winter through, lies in a scooped-out hole in the wash, or huddles in a pit in the salt marshes, waiting to catch the fleeting visions he has captured in paint.

## Dredging For Gold

Work To Be Started On Jugoslav-Rumanian Border

Modern miners are to attempt to dredge the River Pek on the Jugoslav-Rumanian border, on the bed of which gold has been collecting for more than 2,000 years. Up this river sailed Jason and his Argonauts from the Black Sea, and the Golden Fleece of their quest is no legend today, for the peasants of the Pek River Valley steep sheepskins in the water and after a few weeks pull out golden fleeces, the allover gold brought down from the mountains by the water having settled in the wool.

It was here that Alexander found all the gold for his expedition in 328 B.C. Firms of many nations have been bidden to supply the dredging machinery and the operations are expected to be extensive.

## Wins Coveted Award

Albertian First Canadian To Get Commonwealth Fellowship

Ellis McMillan, well known in Western Canada because of his work as coach of Lethbridge Young Liberals, and member of the local entomological department, is the first Canadian to win the Commonwealth Funds Service Fellowship.

One of only five awarded throughout the Empire, the grant is given for intellectual ability, training, research and work accomplished that is of economic importance in the British possession in which the applicant is employed.

At university the holder to two years' research work at any United States university. Mr. McMillan will attend the University of California, at Berkeley.

## Fortune Awaits Boy

Vancouver Lawyer Starts Search For Former Halifax Resident

A small fortune awaits Fred Makel, former Halifax boy, in a Vancouver lawyer's office but so far a transcontinental search has failed to find the lad.

Chief of Police J. J. Conrad of Halifax received a letter from C. F. Campbell, Vancouver barrister, stating that Makel in 1927 resided at 15 North Park street in that city and appealed to police to find him.

The letter told little of the nature of the fortune which awaits the lucky man. Use by that name was listed in local directories but police were making enquiries.

## Russia's Air Train

Plane With Three Gliders Makes Long Distance Flight

Soviet Russia's "air train" completed the first long distance flight of such a conveyance in the history of world aviation, landing at Koktebel, Crimea. Koktebel is 808 miles from Moscow, where the flight started.

The plane and its three gliders made a perfect descent. The gliders were detached from the plotting machine in the air and landed separately.

The hop to Koktebel was made from Zaporozhne, where the train was forced to land because of bad weather.

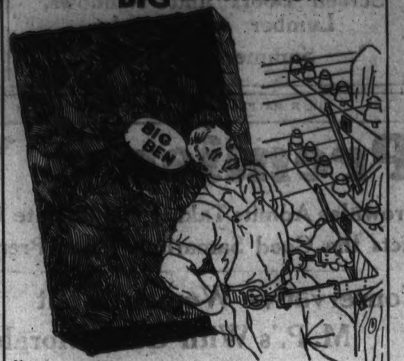

"Too bad about Jane and the man she's engaged to. Neither one of them is good enough for the other. "Where did you get that idea?" "I've been reading the matter over with both families."

Elephants will range themselves alongside a wounded comrade and assist it to a place of safety.

All tree squirrels make nests of twigs and leaves among tree branches.

The world is wide, but there are lots of narrow people in it.

## BIG SIZE BIG VALUE BIG SATISFACTION

If you want the most pleasure, chew—

## The Grasshopper Campaign

Provincial And Federal Organizations To Deal With Menace

The Canadian Insect Pest Review for May of the Dominion Entomological Branch in the 1933 summary of insect outbreaks of that year states with reference to grasshoppers that control campaigns involving the use of poisoned baits were actively carried out in most areas, and, despite many difficulties, resulted in the destruction of vast numbers of grasshoppers and the material saving of crops.

In July and August, extensive dispersal flights of grasshoppers occurred in many parts of the infested region. As a result, practically all of the open prairie land of the three Prairie provinces is now involved, and the areas of severe infestation have been considerably extended, except in Eastern Manitoba where there was an encouraging reduction.

1934 the outbreak will be even more intense and destructive than that of 1933, and consequently Provincial and Dominion authorities are organizing a comprehensive campaign to deal with it.

## Still Works At Ninety

Blacksmith Not Idle Even If Son Runs Business

Partnership of Kemp and Son, village blacksmiths at Worlington, north, England, has been, to quote the official notice, "dissolved by mutual consent," but a man who worked hard as a blacksmith even in his nineteenth year will not be altogether idle. It was not lack of business that caused the firm to dissolve.

Far from it, but simply that Samuel Kemp was 90 and came to the opinion that his boy, James, was old enough to carry on. Samuel Kemp, however, does not intend to retire, "because," he says, "you can't trust these boys." He has finished 78 years continuous work at the forge. Up to the time the official notice of the dissolved partnership was published he used a sledge hammer. Next day he was soldering kettles.

## Canada's Agricultural Revenue

Decrease Last Year Of Over Four Million From Previous Year

The total gross agricultural revenue of Canada for 1933 is estimated at \$762,302,000 as compared with revised estimates of \$766,794,000 for 1932, and \$836,114,000 for 1931. This represents a decrease of \$44,492,000, or 0.6 per cent, from 1932.

There are increases in the revenue from farm animals, wool, dairy products, fur farming, honey, clover, and grass seed, and decreases in the revenue from field crops, fruits and vegetables, poultry and eggs, maple products, tobacco, and flax fibre. The greatest increases are from farm animals and dairy products, while the biggest decreases in revenue are shown in field crops and poultry and eggs.

## A Closely Guarded Secret

Germany is closely guarding its experiments with radio-controlled airplanes. It is reported that successful flights were made by a machine piloted without a crew, direction being entirely by radio. The tests were made under great secrecy, and officials refuse to divulge any information.

## Good Friend To Horses

When Policeman M. Elwood prosecuted John Hill, a grocer, for cruelty to a pony it made the 1013th equine he had befriended in court. Elwood has been on the London force for 20 years. A lover of horses, he watches for cases of cruelty and brings the offenders before the law.

When a golfer misses his drive he expresses his thoughts to a tee.

## Dreams Of A Startling Future

Nicola Tesla On Verge Of Announcing New Discoveries

It is all very hazy, of course, but when Nicola Tesla says he "is on the verge of announcing a new invention of incalculable benefit to the world," the world is warranted in sitting up and taking notice. For the wonders that Tesla has performed in the past are to be considered as an indication of the wonders he may perform in the future. The Italian genius says he is prepared to startle the world with his four new inventions which are likely to provide him with many millions. With these millions he will proceed to put some of his earlier discoveries on a commercial basis.

Chief among these, we take it, he rates the transmission of power by wireless. Tesla remarks that with his discovery put on a commercial basis, the flying machine of tomorrow, freed from the gasoline motor, will have unlimited cruising radius by drawing on transmitted power. And, of course, that would be only one of many possible wonders.

Electricity reduced to terms of power already enters into our daily lives in so many forms that the field awaiting development of Tesla's wireless power transmission is practically without limit. So, although, as we said at the outset, the Tesla announcement is somewhat hazy, it is clear enough to start vivid dreams of a startling future. — Buffalo Courier.

## Belgium Looking To Her National Defence

Joins Countries Who Have Given Up Disarmament Idea

Add Belgium to the list of countries, large and small, who have abandoned all talk of disarmament and are concentrating on the reverse. In Belgium the chief political issue just now seems to be the exact nature of the policy of national defence which shall be adopted. Within the past year and a half this small power has spent no less than \$50,000,000 defending its German border.

Thus Europe marches toward the ideal of bigger and better armaments. It may in the end mean death to a great many, but in the meantime, it is at least helping the armament concerns to maintain production at a satisfactory high level.

## Greatly Increased Riches

Higher Gold Price Made Was Difference To Indian Prince

It is due largely to President Roosevelt that an Indian prince, the Nizam of Hyderabad, is much richer, than he was a year ago. Locked up in his strong-room is a vast store of gold in coin and bullion. Early last year its value was estimated at \$500,000,000. Since then the price of gold has increased about 60 per cent, as a result of the action of the United States in fixing a higher price for gold. The Nizam's hoard is now estimated worth \$800,000,000.

Cotton did not become an important product in America until 1850.

There never yet was a sermon that beat a good example.

Elephants will range themselves alongside a wounded comrade and assist it to a place of safety.

All tree squirrels make nests of twigs and leaves among tree branches.

The world is wide, but there are lots of narrow people in it.

When a golfer misses his drive he expresses his thoughts to a tee.

When a policeman prosecuted John Hill, a grocer, for cruelty to a pony it made the 1013th equine he had befriended in court.

W. N. U. 2049

## The British Imperial Policy Has Been One Of Greatest Factors For Maintaining World Peace

The British Empire has not followed a "policy of drift" in international affairs since the war, Prime Minister R. B. Bennett asserted before a meeting of the League of Nations Society in Canada, at Ottawa. His policy had been one of maintaining the peace of the world and the solidarity of the Empire. He believed that the British Empire had been one of the greatest factors for peace and he expressed the view that under present conditions a "League of Amity" made up of the United States and the nations tying the British flag would be a tremendous factor for peace.

The prime minister spoke briefly at a luncheon of the society addressed by Scott Field, secretary of the Canadian Institute of International Affairs. Speaking on "A Foreign Policy for Canada," Mr. Field asserted that "it is about time that we stopped talking about what Great Britain, or France, or the United States should do." Citizens of Canada could exert a direct influence over only one government. That was the government of Canada.

He expressed the belief that the League of Nations had not dealt with basic reasons for disputes, and that it had allowed itself to become "an instrument of the satiated powers against the protesting powers." Thus it was that powers like Japan, Germany and Italy were withdrawing their active support from the League. In looking over world conditions, Mr. Field painted a dark picture. "It looks as if the disarmament conference was going to end, not in a bang but in a whimper." The world was gasping at the failure of the machinery which it had set up to prevent war.

Senator A. D. McRae, who moved in the senate that Canada withdraw from the League of Nations, was to be congratulated on the fact that he refused to accept a policy of drift, Mr. Field said. But, if Canada withdrew from the League, could Great Britain also withdraw, and if she did would it exempt her from being drawn into European wars, and finally, if Great Britain was drawn in to another first class war, could Canada stay out. The only choice for Canada, in the event of Great Britain being drawn into another war, appeared to be between joining her and secession from the Empire.

If Canada seceded from the British Empire, Mr. Field suggested that the country would be dependent on the United States for defence. The Dominion might eventually become a protectorate of the republic.

But was the world situation hopeless as far as maintaining peace was concerned? The answer was yes, but taken which could help, and Canada should be willing to do her share. The Dominion, said Mr. Field, must be willing to make necessary sacrifices. This country might, for instance, repeal the provisions of the Chinese Immigration Act and substitute an agreement like that with Japan under which 150 Chinese would be admitted every year. Canada might be willing to accept the mandatory principle in respect to British possessions thus sacrificing the tariff preference at present prevailing. The Dominion should be ready to do her part.

Mr. Bennett opened his remarks by saying that he was minister of external affairs of Canada because of a statute and not by choice. This statute declared that the prime minister must also be minister of external affairs. He mentioned this because some people appeared to think he had located this department to himself. He had not done so. He thought that Mr. Field had offered a violent indictment of the League of Nations. It must be remembered that the world was confronted with conditions and not theories. There was a very considerable body in the House of Commons and senate which felt that the expenditure of Canada on the League of Nations was out of proportion to the benefits received. He was not one of these, said Mr. Bennett, because he realized that it amounted to only about the cost of two days of the last war.

The policy followed in the British Empire was one of maintaining the peace of the world and the solidarity of the Empire. He believed that the British Empire had been a great factor for peace. He warned the audience that the world moved slowly, but it progressed. The progress, he believed, had been slow and steady.

**Fine If Tag Not Removed**  
Umbrella tags in London are no longer trailing around to lost property offices and departments in search of the missing article. Someone had a big idea and it is working smoothly. The umbrella loser receives a card telling the lost has been found. All that he has to do to obtain this service is to fasten an address clip to the umbrella.

George Washington was not a signer of the Declaration of Independence.

### Australia's "Costly Failure"

**Demonstration Farm With All Shocks Has Been Leased**

For five shillings a week rent and a lump payment of about \$250 for improvements, the Australian government has leased its "costliest failure," otherwise its \$150,000 demonstration farm at Betchford. The sale comprised 2,553 acres of land at the farm, all the buildings and the leasehold of 45 square miles of territory adjoining. The farm was established in 1912 and was a complete failure in most respects. Cattle and sheep were killed by frost or bogged in the wet season; the sheep were killed by grass seeds, and dairy cattle died of heat or were eaten by crocodiles. White ants ate the stables, machinery sheds and barns, and the soil proved a disappointment. Pineapples, corn and tropical fruits flourished with irrigation. The purchaser, J. Gaden, will use the farm to pasture his horses in the wet season.

By Ruth Rogers

845

FASCINATING SUMMER SPORTS

There's a slimness too in buttoned front closing.

You can indulge in numbers of smart blouses with to-day's pattern. Make one in bright yellow linen, another in red and white check, and a third in yellow and brown printed linen. Each blouse will appear entirely different. And think of it—you can have the three blouses for about the cost of one ready-made blouse.

Gingham, seersucker, organdie novelties, tub silks, are also suitable.

Style No. 845 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size 18 requires 3 1/2 yards of 38-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

### Green Candle Light

**Found Most Suitable And Its Use Is Increasing**

The Dominion Department of Agriculture, recognizing the importance of standardizing egg candling equipment in Canada, initiated investigations as to the most suitable light for that purpose, and, as an outcome of research by the National Research Council, a green glass filter has been evolved. Within recent months, this use of a green light has gained considerable popularity in the Dominion. Many commercial firms have adopted it in their candling rooms, and green light candling appliances are being used exclusively by departmental officers. The ideal light, it is stated, would be blue, because blue does not contain any of the yellow color of the egg. However, the human eye is not very sensitive to blue and for that reason blue is an undesirable color for candling purposes.

### Just Year Behind

At an isolated spot on the Coronation gulf in the Arctic area, an Englishman reads his paper, a London daily, every morning with unfailing regularity. But while he reads the journal on the same date it is printed, he is always one year behind. His bundle of papers reaches him once a year and he does them out to himself, one day. Pilot E. W. Stull, returning to Sudbury from a northern trip, told the story.

It is said that small trout transplanted to New Zealand waters grow as large as the salmon.

### What The Times Demand

**A Constructive Program Of Action, Says Dr. Swanson**

"I am tired of the blundering by men that we have looked upon as leaders; men who should have tackled the job of getting people productive work," said Dr. W. W. Swanson, professor of economics at Saskatchewan University, in an address to the retail merchants at Moose Jaw.

"It's all right to have sympathy for the under-dog and for men on relief but what the times demand is a constructive program of action. We have had enough of the fumbling and halting measures of men in Canada and the United States. It is a great tragedy that the London economic conference adjourned without having accomplished one single thing."

"The world is trembling at the edge of an abyss, and men are looking for leadership. The time has come to remedy these conditions. We should remedy the unethical practices in business and make it possible in the West to permit the merchant to contribute his part in the life of the community and the nation."

"We have had an unbalanced development in the Dominion. The wealth has gone east and great cities have been built up. That wealth should have stayed in the West and the fact that it has gone indicates an unhealthy development. You cannot make the West until you restore prosperity among our farmers and the people of our villages and hamlets."

Building homes and establishing people on the land was the solution which Dr. Swanson saw to many of the problems of the day. The West had suffered because the people had been exploited when the people should have been building homes.

"We get things too cheaply and we are just fooling ourselves as consumers. We need a few men who can give us the vision and the spirit to destroy the spirit of defeatism."

### Need Not Fear Competition

**Teachers Have No Cause To Fear Broadcasting Of Lessons**

School teachers have nothing to fear from the competition of broadcasting, according to W. F. Perkins, director of education for Warwickshire and a member of the central council for school broadcasting, in an address at the conference in Oxford, England, on "New Ideals in Education."

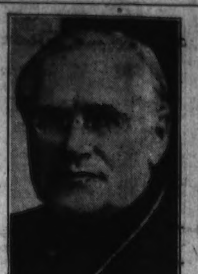

There were few ordinary lessons, he said, which could be given better by means of broadcasts than they could be given by the ordinarily competent teacher in the classroom. The straight talk succeeded, however, in the few subjects—pioneer subjects, such as biology—where there were not a large number of highly qualified teachers.

In music, foreign languages, and certain aspects of English it was obvious that there were resources in broadcasting which were not at the disposal of anyone in the ordinary classroom. That was particularly true of music.

Studio—So the president expelled you. How did you take it?

Ex-Studio—I congratulated him on turning out such a fine young man.

### PRELATE PAGES

Most Rev. Neil McNeil, 53, archbishop of Toronto, who died recently. He was head of the Roman Catholic church in Toronto for 22 years.

### Man-Made Earthquakes

**Machine Being Used To Test Building Against Disaster**

Man-made storms are no novelty to engineers who used wind tunnels to test airplane and automobile designs. Man-made earthquakes are produced at an electrical laboratory in the East. Man-made earthquakes, however, are more unusual.

They are produced at the Massachusetts Institute of Technology, where a group of seismologists and engineers are seeking ways to make multi-story buildings proof against damage from such disturbances.

The earthquake machine looks like a table. When a miniature eight or ten-story building is placed upon it, and delicate measuring instruments attached, a few carefully calculated shakes from the machinery underneath will disclose more about the effects of exceptional stresses and strains than months of steady jiggling could.

Storms, lightning, earthquakes—we suppose engineers would find a way to imitate seismotons, tidal waves or prolonged droughts if they needed to.—Detroit Free Press.

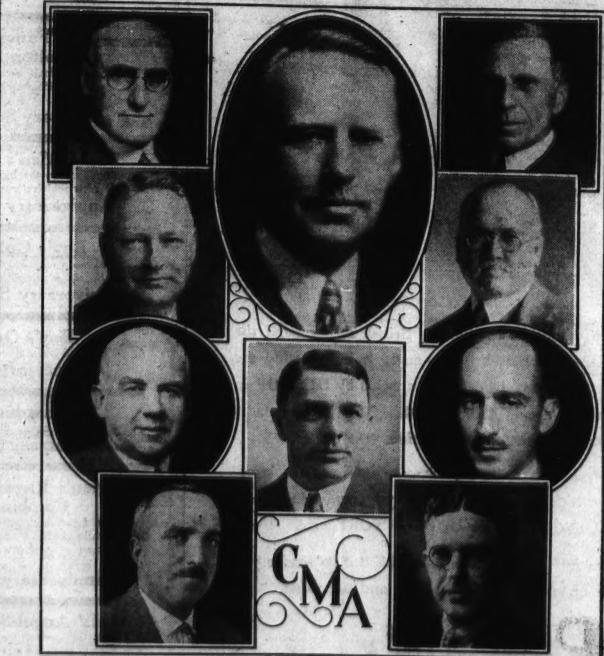

### Prices Should Be Good

**Smaller Hatches Of Poultry Will Cut Down Supply**

According to reports received at the poultry division, Central Experimental Farm, Ottawa, there has been considerable indication of much poorer hatching results than were ordinarily obtained in previous years. These comparatively small hatches will undoubtedly leave their impression on the supply of dressed poultry and eggs available in Canada this coming autumn. With these results in mind it should be safe to forecast that farmers throughout Canada should receive comparatively good prices for poultry produce in the coming fall and winter.

On the anniversary of the Battle of Waterloo, the King of England receives from the reigning Duke of Wellington a small banner, by which annual presentation the Duke holds the estates voted his great ancestor by parliament.

### C.M.A. ANNUAL MEETING AT MONTREAL

The sixty-third annual general meeting of the Canadian Manufacturers' Association was held in the Windsor Hotel, Montreal, on June 7th and 8th. Our layout shows the officers for last year. Left: Top to bottom—J. H. Webb, Montreal, First Vice-President; J. G. Robson, Chairman B.C. Division, Vancouver; T. F. Monypenny, Hon. Treasurer, Toronto; J. A. Wetherpoon, Chairman Prairie Division, Winnipeg; President, Toronto; A. L. Page, Chairman Ontario Division, Hamilton. Right: Top to bottom—L. L. Antles, 2nd Vice-President, Hamilton; J. E. Walsh, General Manager, Toronto; E. Howard Smith, Chairman Quebec Division, Montreal; N. A. Heiler, Chairman Maritime Division, Sackville, N.B.

### Speed Record For Train

**Makes Non-Stop Run From Denver To Chicago**

Railroad men and public alike were wondering what changes in land travel must be expected with the advent of the all-steel, stream-lined train, the newest of which recently made a non-stop run of 1,015 miles in 13 hours and five minutes, averaging 77.5 miles an hour.

Running without a stop from sunrise to sunset, the Burlington railroad's "Zephyr" swept into Chicago with new records for non-stop runs and sustained high speed. It had travelled from Denver.

The Zephyr sped 96.3 miles at a sustained velocity of 80 miles and reached a peak of 112.5 miles per hour which it held for three miles, beating its own previous mark by three miles.

The little carrier, of stainless steel, also shattered the record of Britain's post Royal Scot which had set the non-stop mark by travelling 56 miles an hour for 401 miles.

A 600-horsepower Diesel motor pushed the modernized train along the better than 13 hours between the breaking of a time's tape at Denver union terminal and a similar one at Haled street station at Chicago without a miss. Every inch of the long route was policed. Every highway and country lane was roped off to give the three-coach Zephyr the clear right of way.

### Longest International Highway

**All Weather Road From Los Angeles To San-Francisco Peace River**

The longest international highway in America is said to be the Sunshine Trail which connects Los Angeles on the south with the far-flung Peace River country in the north. This route is now completed for practically the entire distance as an all-weather highway, with the exception of a section on the northern end, which is improved earth road. The highway not only links California's orange groves with the wheat country in the Peace River district, but also connects the natural park and mountain resorts of the western states with those of the Canadian Rockies in Alberta.

### When To Sell Broilers

**Poultry Raisers Receive Best Returns From Light Weights**

According to Professor Paul G. Riley, nine out of ten poultry raisers would be better off if they would sell broilers at two to two and one-half pounds for heavy breeds, and from one and one-half to two pounds for the light breeds, rather than to carry them on to heavier weights. Selling them at weight relieves the overcrowded condition in the brooder house when chicks are from eight to ten weeks of age, and also returns more profits.

Twenty suits, eight overcoats, 12 hats, and 24 pairs of boots and shoes, with other garments in proportion, are necessary for the well-dressed man, according to American experts in male fashions.

It is easier for real estate agents to rent out rooms numbered 711 in New York office buildings than rooms bearing any other number.

## Necessary To Take Steps To End Causes Which Are At Root Of World Wheat Problem

### Harlem's Social Register

**Colored Folks Must Have Money To Get In**

American "Society" has its Social Register, which comprises the names of the people who really count in the social whirl. The number of names is limited, and to be admitted, an American has to be an ancient lineage dating back from the Mayflower—plus money to boast having a house on Fifth Avenue—which means money anyway; or just to have a lot of money. Money seems to be the primary requisite. If you lose your money, out you go from the next issue. Gene Tunney, who was just a Marine once, made a lot of money with his fists and married into a family which was in the Social Register, and being a millionaire in his own right, crashed his way into the book.

Now a Harlem man—colored, of course—is compiling a Social Register for the people of that district of New York. Only "colored" folks will be admitted—and they must have money.

There will no doubt be as much rivalry to get in the Harlem Social Register as in the other one. The gentleman who is getting it up has undertaken a thankless job. The Van Porters will be there, of course. Also the gentlemen who bought a car. Then there will likely be Kid Chocolate and several other colored gentlemen who made fortunes in the ring, which appears to be the chief means by which young negroes gather lots of money quickly. George, the Pullman porter, won't stand a chance. Lots of negroes are quite well to do, and possibly a mark of \$10,000 will buy a place in the Harlem Social Register.—St. Thomas Times-Journal.

### Shelter Belt Information

**Proper Sketch Needed To Determine Number Of Trees Required For Given Area**

In the assistance given by the Dominion Department of Agriculture to private farmers in planting tree shelter belts, it has been found that applicants living at a distance or where an inspector has been unable to make a visit have not given sufficient or clear enough information to enable the Forest Service to figure out the requirements for trees. In many instances the full length and breadth of the land prepared for planting the shelter belts have not been given, and the position and distance of the permanent buildings from the proposed belt have been frequently omitted. To rectify this, a short circular has been issued on how to make a sketch of the proposed shelter belt by the superintendent of the Forest Nursery Station, Indian Head, Sask. It is important when an applicant sends a rough sketch to the station at Indian Head or to the station at Sutherland, Sask., that the measurements must be shown, both length and breadth, of all ground ready for planting; also the distance between the inside of the proposed belt and any permanent buildings, and the position of any existing plantations or belts of trees. The measurements should be given in yards, not in rods or feet.

### Wholesome Canned Fruit

**Strict Regulations With Regard To Method Of Packing**

Among the requirements of the Meat and Canned Foods Act and regulations with regard to the packing of cold pack fruits, all the fruit must be sound, wholesome, and fit for human food. All fruit must be washed in clean water; then thoroughly drained before filling into the containers. The containers, such as barrels, cans, etc., must be clean and thoroughly sterilized before filling with fruit. The fruit must be graded for quality. The requirements for such grades of quality must be consistent with the established grades of quality for the same variety of fruit for canning. Packers of cold pack fruit are required to keep records of the total weight of fruit and sugar used each day, and only proper approved processes must be used in the preparation and storage of all cold pack fruit.

### Death Ray Apparatus

C. R. Chadfield, a scientist in England, is the inventor of a death ray apparatus that is capable of producing a high frequency electrical oscillation of 300,000,000 cycles between two copper plates. Actual experiments have shown that insects, mice and flies which have come in contact with the ray were killed instantly without much as leaving a mark of violence on their bodies.

The largest valley in the world is the Great Rift of Africa, which begins in the north of Palestine and stretches nearly as far south as Natal, a total of 5,000 miles.

When the world is too poor to be tempted it will begin to get better.

Before the world depression, the geographical distribution of the world's wheat crop was largely determined by costs of production. As a result of mechanization and biological improvements, costs had been substantially reduced, especially in the United States, Canada, Argentina and Australia. Since 1929, however, the cost factor has been increasingly disregarded. By means of tariffs and subsidies, total production in importing countries (and above all in the European importing countries) was increased from an average of 1,059 million bushels during 1927-29 to 1,400 million bushels in 1933. During the same period the crop of the exporting countries, excluding the U.S.S.R., was reduced from 2,589 million bushels. But curtailment was not drastic enough to prevent an enormous accumulation of stocks in exporting countries and a collapse of free-marketing prices.

This large-scale geographical redistribution of the world's wheat crop could only be carried out at the expense of producers in exporting countries and of consumers in importing countries. An improvement in the demand of importing countries is being prevented by the maintenance of prices at a level far above free market quotations. In an attempt to alleviate the plight of wheat growers in exporting countries, governments resorted to currency depreciation and subsidies, as, for example, in the United States. In fact, the greater part of the world's wheat crop is now being subsidised in one way or another, both in exporting and importing countries, at the expense of their respective consumers.

This state of affairs, which defies adequate description, is calculated to fill the rational observer with despair. It savours of an economic farce; but the large numbers of undernourished and even starving people in the world give the farce a tragic twist. It is earnestly to be hoped that the Advisory Committee will at last face the real wheat problem and take steps to solve it speedily. The responsible authorities of the importing countries must realize that unless they are willing to accept the wheat of the exporting countries they cannot hope to sell their own wheat. Similarly, the governments of some of the exporting countries should consider a reduction in their tariffs on imports of manufacturers' test they be held responsible for the ruin of a large proportion of their agricultural community. Tackled on these lines, the wheat problem is not impossible of solution. The future of the great wheat-growing countries seems assured in years to come, since the present wave of economic insanity will no doubt pass; but the urgency of the problem brooks no delay.—The Economist.

### All That Is Needed

**Canada Will "Get Places" When Trade Picks Up**

"Quite frankly, the object of this advertisement is to stimulate business," says the heading at the top of a Canadian National Railway advertisement now running in Canadian newspapers. After all, that is all the Canadian railways, public and private, need to put them on the highway to success. That is all any business in Canada needs—more business. Back in the 1925-1929 period, the Canadian railways could hardly keep up to the business in sight. Canada was doing more than \$2,000,000,000 trade annually, and we were getting places. The railways were carrying the freight. Railwaymen were busy. Those times will come back again when we decide that the way back to prosperity is to trade. That means cutting through the obstacles, both internal and external.—Leithbridge Herald.

### Giant Cricket Found

**Discovered By New Zealand Naturalists On Northern Island**

The cricket on the hearth now has a newly-discovered giant cousin who lives on a little island off the northern coast of New Zealand. His body is larger than a man's thumb and its legs would more than cover a saucer. This mammoth of the cricket family was discovered in a recent expedition made by members of the scientific staff of the Auckland Museum the Poor Knights Island about 100 miles north of Auckland. New Zealand has a species of crickets which are known as weta. The weta is the biggest member of the cricket family, being slightly larger than the Australian king cricket. But the one found on the island is the largest ever seen by New Zealand naturalists.

A parachute, which resembles a giant seed of a maple tree, and which will permit mail planes to drop packages for low altitudes, has been invented.

The Gila monster is Arizona's most poisonous reptile.

## SPRUCVILLE NEWS

There will be a Novelty Dance in the hall on Wednesday, July 4. Mr. Wright's orchestra will furnish the music. Everybody come and have a good time.

Mr. and Mrs. Barnes and Morris left on Wednesday for an extended visit to the States.

The Junior Busy Bees will hold their meeting in the hall on Friday night, June 29th. The members are requested to attend, as this is a special meeting. Mr. and Mrs. Heath and Mrs. Trevelyan are motoring to Edmonton on Friday to take Molly to the University for an examination with Dr. McWhirter.

**THE CHURCH OF ENGLAND**  
 Rector: The Rev. T. H. Chapman  
 July 1, 5th Sunday after Trinity  
 11:00 a.m. Morning Prayer and Sermon.  
 7:00 p.m. Evening Prayer and Sermon.

**TO BE KEPT IN MIND:** The 18th Annual Diocesan Summer School at Banff, from July 3-7. Apart from transportation, it will cost you only \$7.50 for a week in Banff. Get your Registration Form from the Rector and Register without further delay.

W. J. McKilligan, of Bentley, died very suddenly on Monday last from a heart attack. The funeral is being held today.

## BAPTIST CHURCH

Church School at 11.  
 Sunday eve., at 7:30. Sermon: "Power in Life."  
 Members and friends of the B.Y. P.U. come to the last meeting of the Summer Friday at 8 p.m.

A society church has been named "The Way to Heaven." In the bottom part of the summer a sign hung in front of the building, "Closed in July and August."

With the exception of the last Sundays of July, the time of the Baptist Assembly at Gull Lake, will be held every Sunday evening.

**MISS PEARCE HONORED**  
 Miss Gertrude Pearce was the guest of honour when Mrs. Ben Henderson, Mrs. T. F. Roberts and Mrs. Archie Chiswell were joint hostesses at a shower at the home of Mrs. Henderson on Saturday afternoon. Miss Pearce was the recipient of many useful gifts charmingly presented by Miss Henderson and Miss Flewelling, quaintly dressed as bride and groom. About 30 guests were present and the afternoon was greatly enjoyed.

**U.F.A. CONVENTION**  
 There was a large attendance at the Wetaskiwin U.F.A. Constitution convention held here this week, when many resolutions were brought before the meeting. Among the business transacted was the setting

of the date of the Provincial U.F.A. Constitution convention for July 23, at Lacombe.

A full account of the meeting will appear next week.

## THE STAMPEDE

Lacombe's 3rd annual Stampede, held yesterday, was well attended, and thrills galore were given the large crowd. Some exceptionally good riders took part in the stamper and competition was very keen. A full report of the winners, etc., will appear next week.

Cecil Duran, of Ponoka, was seriously injured. During a horse race he was thrown from his horse when the saddle girth broke. He struck the ground with terrific force and received a serious skull injury. On being examined here, he was immediately rushed to the University Hospital where a brain operation was performed by Dr. H. H. Hepburn. His condition today is reported as serious.

**ST. ANDREW'S UNITED CHURCH**  
 Rev. R. B. Layton, Minister  
 Services at 11 a.m. and 7:30 p.m.  
 Sunday School at 11 a.m.

A congregational picnic will be held at the United Camp, Meridian Beach, Gull Lake, on Monday afternoon, July 2nd. Cars will leave the church at two o'clock. Persons requiring transportation are asked to apply for it.

Mrs. Susan Coates, of the Woolly Neck district, died on Monday last after a short illness.

A party of Scottish Rite Masons from Calgary and Edmonton enjoyed a tournament on Lacombe golf course yesterday. In the evening the visitors were entertained at a banquet in the Adelphi.

There will be a public meeting on the Douglas System of Social Credit in the skating rink on the afternoon of Tuesday, July 3rd at 8 p.m. This meeting will be addressed by Mr. E. C. Manning and Wm. Abernethy, B.A. both of Calgary.

The largest crowd of the season witnessed the ball game at Gull Lake on Sunday afternoon. The Gull Lake boys after a good start, holding Lakeside 4-0 in the first three innings, then "blew up" and Lakeside started the late "Merry-go-round" winning the game quite easily to the tune of 15-5.

The W.A. of St. Cyprrian's Church Lacombe, are holding a sale of needlework and home-baking at an afternoon tea at Mrs. Sandbrook's Ice Cream Parlor of Wednesday, July 11 from 2 to 6 p.m.

Remember the opening dance in Fernie's Hall on Saturday night, June 30th. The hall has been fixed up and the floor is in Al shape. A good band has been engaged for the summer. Boost Gull Lake, attend the dances at Fernie's Hall.

## WILSON'S FLY PADS

Each pad will kill flies all day and every day for three weeks. 10 CENTS PER PACKET at Drugists, Grocers, General Stores. WHY PAY MORE? THE WILSON FLY PADS CO., Hamilton, Ont.

HAD NARROW ESCAPE

From now on, O. L. Scoggins will consider Friday a lucky day. On Friday last, while coming in to Lacombe he struck the railway crossing just south of Jackfish in time to see the noon express bearing down on him. His car was on the track and he made a desperate attempt to back off, succeeding in getting the machine clear with the exception of a portion of the front fender. The train struck this and turned the car around, and fortunately the driver and passenger in the auto escaped with a shaking up. Scoggins says "a mile is as good as a mile," but in future he is going to "stop, look and listen" before going over a railway crossing.

### SPRING VALLEY NEWS

A very pleasant afternoon was spent at the home of Mr. and Mrs. W. E. Sutor on Friday, June 15, when the friends and neighbors numbering about fifty, gathered in honor of Miss Helen Sutor, a bride-elect.

A short social time and musical numbers were much enjoyed. Miss Sutor's school mates, Miss Agnes Forrest, Miss Dorothy Cull, Miss Isabel Matheson and Miss Vera then carried in a beautiful and large array of gifts which were opened and appropriately responded to by the bride-to-be.

Following this a delightful lunch was served.

### HOADLEY DEPENDS PHONE SYSTEM

Financial losses incurred by the provincial telephone system, were not the fault of the management or equipment, but were due to the economic problem with which the public utility was confronted, declared Hon. George Hoadley, newly appointed minister of telephones.

The telephone department, despite its financial record, was a splendidly managed, splendidly equipped enterprise. The New York expert, Mr. Hoadley said, had found no criticism of the personnel of the department. It was not the fault of the system. The difficulty lay with the problem the system was up against.

The Last We Forget Club hope to hold their annual picnic at the summer cottage of Mrs. C. B. Halpin, Gull Lake, on the afternoon of Wednesday, July 18th.

### ELIAS KITCHING

ROD DEER, June 26.—After suffering ill health for some time, Elias Kitching, 46, well known milk dealer committed suicide here early Sunday.

His body was found in an out-building behind his home with a discharged gun beside him. During the last year he had several attacks of nervous trouble and was suffering from a breakdown recently.

He is survived by a family of six and his widow. The late Mr. Kitching was an old time resident of Lacombe, having for some years farmed the P. Talbot place near town. He has many friends in the district and was highly respected.

### The Date for Dis- on Business Tax Expires June 30.

THOS. NEWMAN DEAD

After a long illness, Thomas Newman, for many years a respected resident of Lacombe, died on Saturday last, in his 70th year. For several years he had been suffering from a painful disease in Lacombe, but retired from active work some years ago. The funeral was held on Monday, services being conducted on St. Cyprian's Church. Mr. Bert Newman, contractor here, is a son.

### OLD TIMERS ORGANIZE

An enthusiastic picnic was held last Wednesday afternoon at Meridian Beach, Gull Lake to complete the organization of the Old Timers' association. An exciting and exhausting game of soft ball was played, one participant playing for the first time in sixty years. Sandy Campbell's team won, but the umpire (Norman Morrison) was charged with partiality. Both men and ladies indulged in "Home Shown" after a hearty supper, Clarence Darnon was elected to the chair in the absence of Dr. Sharpe, and much business was done. The election of Dr. E. M. Sharpe, as President, of Mrs. Norman Morrison, as Vice-President, and Jesse Fraser as Secretary-Treasurer, was confirmed. Messrs. W. F. Puffer, ex-M.P.P., Samuel Nicholson, and Percy A. Switzer, were elected honorary Presidents. The following directors were added to the Executive: Messrs. Roy Flegal, Morningstar; A. M. Campbell, Lacombe; Harry Brownlow, Brownlow's Landing; E. W. Grose, Oliver; E. B. McInnis, Blackfalds; T. A. Jeddige, Rimby; Herman Zeltz, Iowalla; Edward Giesse, Mirror; Clarence F. Darnon, Bentley; Thomas Jones, Chigwell; Edward H. Parby, Tees-Alis; and J. L. Walters, Haynes-Joffre.

A Committee was selected to draft a set of by-laws to be presented at the next meeting. It was decided to hold another picnic before Harvest, the time to be chosen by the Executive. An annual fee of one dollar per family was set. A vote of thanks was tendered Rev. R. B.

Layton for his services in initiating and forwarding the work of forming the Association. The Ladies of the Old Timers' Association were thanked for providing such an excellent repast, which was enjoyed by all. Thirty nine new names were signed up.

### INTERESTING CONCERT

Spenceville Hall was well filled on Sunday evening to hear the concert put on by the Lacombe Band, under the direction of L. D. Wright. Interspersing the band numbers were a recitation by George Froodfoot, violin solo by Miss Margaret Wade, duet by Misses Shirley and Joyce Mitchell and vocal solos by Miss Eunice Stout, Mrs. Wm. Parker, Master Victor Wright and Mr. Thos. Wilkes.

Mr. and Mrs. Wm. Roberts, agent the week-end in Lacombe, the guests of Mr. and Mrs. H. L. Brown. Mr. Roberts for some time was a member of A. M. Campbell's staff, but is now with the H.B. Co., at Winnipeg.

The Lacombe High School annual summer dance will be held in Fernies Hall, Gull Lake on Friday, tomorrow night, June 29. All High School, ex-High and their friends are invited. A truck will leave "Hunters" corner at 9 o'clock. Those not having means of transportation will be carried out to the lake and back.

WORLD HAPPENINGS  
BRIEFLY TOLD

The Straits Settlement Legislative council adopted a bill restricting rubber production in conformity with the London agreement.

France and Great Britain plan to consider jointly the problem of debt owed to the United States at a meeting of envoys in Geneva.

Forty aborigines and whites have perished in Western Australia, victims of a mysterious disease, the Daily Herald's Australian correspondent has cabled.

Hints are heard that a new move would be made to get Germany back into the tottering world disarmament conference. The move was said to revolve around the United States.

The body of Sam Behan, Portsmouth penitentiary convict who died suddenly of a heart condition, has been claimed by his widow and has been sent to Brooklyn, N.Y.

Half a million pickers fry were deposited recently in the Moose Jaw river at the Wild Animal park by officials of the department of natural resources.

Enthusiastic adoption of a pacifist attitude and course of the organization of public opinion in the interests of peace was made at Toronto at the conference of the Association of Canada Clubs.

Birth of five daughters to Mrs. Olive Monroe near Galtland, Ont., is the first quintuplet birth in Canada. So far as is known, Dr. F. C. Rouley, general secretary of the Canadian Medical Society, said.

The shipments of livestock from Western to Eastern Canada during the first 17 weeks of 1934 and 1933 (later figures in parentheses, brackets) were: Cattle, 29,267 (32,135); calves, 164 (191); hogs, 82,908 (118,992); and sheep, 40,423 (32,245).

## Relief In British Columbia

Present Position Of Affairs Breaking Down Means Of People, Says Premier

Unemployment relief as administered at present in British Columbia will be terminated on August 1 because of numerous complaints that the administration of relief has become a "racket," Premier W. D. Pattullo announced.

The premier declared it is the policy of the government that no one in the province shall be allowed to suffer for want of the necessities of life, that after August 1 there would have to be a re-organization. "There is no doubt whatever," the premier stated, "that the present position of affairs is breaking down the morale of our people. So far as is possible within the resources of the province, necessary work will be carried out and it is understood also that Ottawa will have a working program of its own."

Those requiring assistance, it is understood, will have to re-register on relief rolls after August 1 under rules and regulations to be formulated and to be administered by the provincial minister of labor.

## Won Against Heavy Odds

Man Without Arms Says Mother's Courage Bought His Success

This is the story of a conquest over almost unbelievable odds of a man who has been without arms and hands since birth, yet who shaves, writes perfectly, does a hundred things. All with his feet.

He is William R. Watson, 30, Edmonton, in Montreal to attend the convention of the International Society for Crippled Children. He wants to see established in Canada vocational training schools for handicapped children.

You couldn't help admiring and liking Mr. Watson. You see him open a brief case with his feet, reach in and sort among some papers. You see him pick up a hair brush and brush his hair.

He graduated in arts and law from the University of Alberta after taking his lectures down by writing with his mouth, an accomplishment he had mastered equally as well as writing with his feet. He learned to swim and to eat with his feet. He calls footwriting, "pedescript." He skis and plays bridge, using a bridge for his cards at the end of the table.

To his mother he gives the credit. His mother, he said, has stood by him all his life, has been the driving force behind his accomplishments.

## Russia Buying Wheat

Said That Soviets Have Joined Ranks Of Wheat Importers

Russia, once considered a menace to the wheat-growing nations of the world, has joined the ranks of wheat importers, the London Financial Times states.

The newspaper said the Soviet was buying Australian and Argentine wheat for shipment to Vladivostok and that it had contracted already for cargoes totalling 22,500 tons. Of these, it added, two were bought from Australia and one from Argentina.

Sunflowers were cultivated by the Indians long before white men came to America.

## To Visit Australia

Duke Of Gloucester To Make Extended Tour In September

British government has announced that the Duke of Gloucester will leave for Australia in September aboard the H.M.S. Russell and will spend four days at Colombo, Ceylon, before continuing to Perth, West Australia, where he is due October 5.

He will arrive at Melbourne, Victoria, two days later and will open officially the centenary celebration of the state of Victoria.

His Royal Highness will sail December 10 from Brisbane, Queensland, going home via New Zealand where he is due December 15. He will leave that Dominion at the end of January and proceed via Bay of Islands for deep sea fishing.

He will visit Fiji, Western Samoa, sail through the Panama canal and possibly touch Jamaica en route to England.

The Duke of Gloucester, the king's third son, will go to Australia instead of his younger brother, Prince George, who visited South Africa in the spring.

## More Valuable Than Gold

New Zealand Miner Found Feathers Of Extinct Bird

Treasure more valuable than gold has been found by a gold miner in New Zealand. It is a box of 70 feathers of the now extinct huia bird. Experts say that the Maori, who collected the beautiful feathers to adorn their chiefs, must have hidden the box more than 100 years ago. While working on the bank of the Motueka River, the miner found a package sixteen inches long. There was an outer wrapping of finely woven flax matting, an inner of native cloth made from the bark of a tree, and inside was a roughly-cut Maori box with its handles of feathers. The huia bird had not been seen alive in New Zealand for 40 years. To the Maoris of old, who never learned the art of working metals, these feathers were more precious than gold, and they are claimed so by modern New Zealanders.

BUTTON CLOSING GIVES SMART INTEREST AND YOUTHFULNESS TO NAVY AND WHITE TIE SILK PRINT PROCK

There is immense satisfaction about getting into something with clean cut sternal lines. It gives one that trim feeling.

To-day's smart little sports dress has much individuality. It's very simple to make it. And it can be sleeveless, if you prefer it. See small back view for the drop shoulder that covers the upper arm so modestly.

For frankly hot wear such materials as striped or checked seersucker, pique, linen, shirting cottons, pleated ginghams, tub pastel flasks, printed satens, etc., will be smart.

Style No. 740 is designed for sizes 14, 16 and 18 years, 36, 38, 40 and 42 inches bust. Size 36 requires 4 yards of 36-inch material with 1/2 yard of 36-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## Little Journeys In Science

SPONTANEOUS COMBUSTION  
(By Gordon H. Chase, M.A.)

Combustion of a fuel has been shown to be the rapid chemical combination of the material with oxygen, accompanied by the production of heat and light.

The temperature to which a substance must be heated before it will burn is known as the ignition or kindling temperature. We know that paper and wood will ignite more easily than coal. When we use a match to light a fire, we rub the match-head until friction has heated it to its kindling temperature, and the tip raises the temperature of the stem to its kindling temperature, and so the process continues until the wood or coal reaches its kindling temperature, and burns. As long as a substance is cooler than its kindling temperature, it cannot burn.

Sometimes we have a slow combining of oxygen with a substance which develops into active burning, and this is known as spontaneous combustion. Scientists have shown that a given weight of material, for example, iron, in combining with oxygen, to form a certain oxide, will give off the same total amount of heat whether the union proceeds rapidly or slowly. If the combining goes on slowly and the heat goes off, little rise in temperature will be observed. But if the material is a poor conductor of heat, we find that the heat accumulates until the kindling temperature is reached and burning commences. Such a situation often arises when rags soaked with the oil used in making paint (linseed oil and turpentine) are left lying about, instead of being placed in a metal can, or, better still, burned. These oils, in "drying," combine with oxygen from the air, and turn into a tough resin-like material. Rags being poor conductors, the heat developed finally sets the mass on fire. Fires in coal bunkers and hay stacks arise from the same cause—slow combination with oxygen, with the accumulation of the resulting heat until the kindling temperature is reached. The beach-wrecked carcass of the whale has been known to take fire spontaneously due to the union of oxygen with fat.

## Eye Sometimes Deceives

Has Let Down Astronomers At Times And Caused Trouble

There are many instances in which the eye can be a deceiver, according to Dr. H. Spencer Jones, the Astronomer Royal. Recently he told the British Optical Association, meeting at the Royal Institution, in London, some of the ways in which the eye can "let down" astronomers.

Many of the deceptions can be tested by the ordinary man, although in most cases they have been discovered by astronomers in the course of their work. Here are some of them: The upper of two equally faint lights looks brighter to most people than the lower, or the right than the left. Faint, colored stars appear to become more colored as the observer looks at them. On a bright night a red star makes a better showing, compared with its neighbors, than usual.

Dr. Spencer Jones said that many of these troubles of astronomers could be explained by the fact that the eye had two sets of light detectors—"cones," used in bright vision, which distinguish between colors, and "rods," used in faint vision which are color-blind.

"It is not generally realized," he said, "that on an ordinary clear moonless night the sky, when free from the influence of artificial lights, is by no means dark. Its brightness is about half that of the Milky Way."

Dr. Spencer Jones explained that if the sky were perfectly black we could see with the unaided eye eight times as many stars as we now do. "The night sky gives a characteristic light of its own, of which I have made many records at the Cape in connection with a scheme organized by Lord Rayleigh," he said. "It is a moot point whether it is a similar effect to the Aurora of Polar regions, which is caused by the impact on the upper atmosphere of electrons from the sun."

## The British Way

Efficacious Quality Of British Justice Due To Firmness

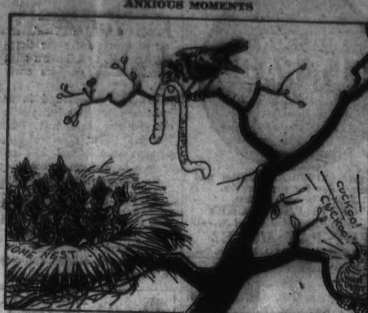

The refusal of the British authorities to permit Treblefish Lincoln to land in the United Kingdom is well, the British way. They don't want Lincoln in the Old Country—and that's all there is to it.

Which firmness explains the efficacious quality of British justice. Lincoln had his opportunity to become a good and useful citizen of England. That is the way the Englishman looks at it. And who will say it is the wrong attitude?—Herald.

## Will Not Sell Munitions

The United States House of Representatives has voted to give President Roosevelt authority to bar sale of arms and munitions in the United States for use in the Gran Chaco war between Bolivia and Paraguay.

Poison ivy does not poison any other creature except humans.

The Chancellor of the British Exchequer has many demands on his budget surplus.

## Recipes For This Week

(By Betty Barclay)

## LEMON MUFFINS

Juice of one lemon  
1/2 cup lard  
1 egg, beaten  
1/2 cup sugar  
4 teaspoons baking powder  
1 cup milk  
2 cups flour  
1/2 teaspoon salt

Cream lard, sugar and salt; together. Add eggs, then milk, last baking powder and flour sifted together three times, then lemon juice. Beat until smooth. Bake in hot oven about 25 minutes. This will give you from 12 to 15 delicious muffins.

## ORANGE BANANA SALAD

(Serves 6)

6 oranges  
2 to 3 bananas  
Lettuce

Peel oranges, removing skin down to juicy pulp. Cut in slices and cut in half. Peel bananas and slice them. On individual salad plates covered with beds of shredded lettuce, arrange alternately half slices of oranges and banana slices. Centre with a pat of butter dressing and a banana ball or cherry, if desired.

## Low Price For Planes

British Sells Reconditioned Fighters For Two Hundred Dollars Each

Aeroplane entirely reconditioned and capable of doing 120 miles an hour, price—\$200!

The British air ministry has sold many of these aeroplanes at prices ranging from \$100 to \$200. They are usually given for second-hand cars. They originally cost \$20,000 and were built as fighters, with engines which cost at least \$5,000. They are in perfect condition and are almost as airworthy as when new.

There is one which is now on offer for \$350, but for the extra \$150 you get a spare engine, two spare wings and the all-important certificate of airworthiness. The engines are of a world-famous make and in tip-top condition.

These machines and engines are obtainable at these crazy prices because they have been superseded by later fighting models. While light aeroplanes can be used fairly cheaply, these powerful machines cost so much to run that few private owners can afford to run them.

A bee has been found to travel 43,716 miles in gathering one pound of honey.

Mallard ducks are learning how to make their nests in trees instead of on the ground.

Four commercial air services are maintained in Japan by private companies.

## WHEN "CITY" WON THE CUP

His Majesty the King presenting the Football Association Cup to Sam Cowan, captain of Manchester City, after his team had defeated Portsmouth in the final at Wembley. This was Manchester City's third appearance in the Cup final, and as Sam said, "It was a case of now or never."

## ANXIOUS MOMENTS

## Plenty And Poverty

Canada Is Well Stocked With Nourishing Foods

If old man "Famine" should drop in unexpectedly he would find Canada's public ice boxes well-stocked with nourishing foods.

According to a recent bulletin the butter in cold storage warehouses and creameries on May 1st amounts to 2,515,091 pounds of creamery and 1,481 pounds of dairy, the creamery butter total including approximately 330,000 pounds reported by firms added to the list since March 1, 1934. Cheese stocks total 9,893,432 pounds. Eggs in cold storage amount to 3,105,377 dozen; fresh eggs 610,814 dozen, and frozen eggs 28,128 pounds. Fresh pork not frozen 3,330,000 pounds; fresh frozen 11,599,792 pounds, and cured or in cure 17,234,675 pounds. Pure lard in storage amounts to 3,609,702 pounds. Beef stocks total 4,205,621 pounds of fresh frozen; 4,340,036 pounds of fresh not frozen; 191,991 pounds of cured, and 108,272 pounds of beef in process of cure. Fresh frozen veal total 513,318 pounds; fresh not frozen 642,606 pounds. Mutton and lamb stocks total 1,785,089 pounds of frozen and 137,136 pounds of not frozen. Poultry stocks are as follows: Broilers, 87,769 pounds; chickens, 2,278,577 pounds; fowl, 675,779 pounds; ducks, 78,678 pounds; geese, 70,435 pounds; turkeys, 2,160,294 pounds; and "undressed" poultry, 596,719 pounds. Fresh and frozen fish "on ice" totals 5,430,590 pounds and there are also 3,035,414 pounds of smoked, dried, pickled or salted fish.

## Power From The Clouds

Hopes To Obtain Electrical Energy From Lightning

Studies of the various phases of lightning and thunderbolts have been undertaken by Dr. H. F. J. Schenck, director of research for the Institute of Electrical Engineers, at Johannesburg, South Africa, with the hope that knowledge of the mechanism and nature of thunderbolts may enable man to utilize at least part of the tremendous electrical energy being constantly built up in the clouds and discharged to the earth.

## French Tree For Australia

The French government will present to Melbourne, Australia, a tree from a battlefield in Northern France where French and Australian soldiers fought side by side in the World War. It will be sent in time to be planted at Victoria's Shrine of Remembrance.

The famous European news agency, "Reuter," started business some 90 years ago with a pigeon post service.

## A Cherished Possession

Original Death Warrant Of Scottish Queen Owned By Calgary Man

The death warrant which brought the lovely head of Mary Queen of Scots under the executioner's axe and shocked a nation which loved her, is in Calgary.

It was shown at a recent exhibition at the Curio Shoppe at the Hudson's Bay Company's store, and is one of the cherished possessions of A. W. Riddle, for many years an antique dealer and collector in London, England. It came into Mr. Riddle's hands from an English family named Howard, in whose possession it had been for several generations.

Signed by Queen Elizabeth in 1587, the warrant for the execution is now fragile and yellow, and its edges are worn, but the bold black writing stands out clearly, though far from legibly. Needless to say, modern stenographers were apparently valued highly in the sixteenth century, for the warrant has many words crossed out, and others inserted above the lines. The old style letter "r" adds further confusion for those who have been studying the document.

A copy of the London Times of 1849 ranked beside the historic warrant, and the fact is still clear and woodcuts illustrate scenes from the marriage of Queen Victoria and Prince Albert, the Royal Consort. The woodcuts after interesting studies of the costumes of the period, and the fact is still clear and delicately marked.

A chronological tree of British history tells the story of the Empire's rise, traced through intricate branches and trunk in finest of lettering. A book containing 270 seals of kings and emperors, princes and the nobility of several European countries, goes back to the time of King Edward I. and Edward III. The seals are of heavy wax on parchment, their lustre and vivid coloring very little dimmed with the passing of the hundreds of years. These, too, are from Mr. Riddle's valuable store of antiques, which also includes some of the early copies of Shakespeare and Milton.

## Produced In Dominion

Canadian National To Feature Home Grown Foods On Dinner

Distinctive Canadian foodstuffs and dainties in their proper season will be a feature of the table d'hôte meal service on the trans-continental trains of the Canadian National Railway, commencing with the abolition of table service on these trains, stated W. W. Swindon, general superintendent of sleeping, dining and parlor car services on the National system. Sea foods from the Maritime provinces; meats, including the famous Ontario spring lamb; freshwater fish, including Lake Winnipeg goldeyes, and fruits from the Maritimes, Quebec and Ontario, and the famed Okanagan valley of British Columbia will all be featured in these plate service meals at appropriate seasons.

"Tourists from the United States when they board our trains at border points and visit the dining car will find fresh broiled lobsters, amlets, baby mackerel and other favored sea foods, along with potatoes from Prince Edward Island, apples from Nova Scotia and blueberries from the Maritime provinces, all with places of honor on the menu when these foods are at their best," said Mr. Swindon.

## Awarded Medal

Canadian Writer Receives Recognition For Outstanding Contribution

Frederick Philip Grove, awarded the Dr. Lorne Pierce medal for an outstanding contribution to imaginative literature, is a native of England. He came to Canada in his youth and one of his first jobs was that of a waiter in a Toronto restaurant. Later he settled on a ranch in Western Canada and lived there for several years. It was while ranching that he wrote "In Search of America," which work is best known by him. He subsequently became head of an Ottawa publishing house.

## Advice From Tibet

Newspaper Tells World How To Restore Good Times

Tibet's only newspaper, which comes out only once a month, knows just what is the matter with the western world. It is called The Mirror of Events in Every Corner of the Globe. It asserts that the economic crisis has been caused by wheels, because machines "enable two men to do the work of 20,000." Unemployment means no money and lack of money kills trade, the argument runs. The western world is warned that it must suppress wheels before it can have better times.

Scientists have been unable to determine the particular group of animals to which the gnu of the African plains is most closely related. It bears a close resemblance to three other animal species, the horse, the antelope and the ox.

Surgeons are now applying a new X-ray method for detecting curvature of the spine, enabling correction before it is too late.

## Agricultural Notes

Many Items Of Interest To The Western Farmer

The average annual loss in the Prairie Provinces through cereal rust is calculated at \$25,000,000.

Comparing Reward, Marquis, and Garnet wheats at protein content, Reward stands highest, Marquis second, and Garnet third—Dominion Division of Chemistry.

To produce an acre of turnips in the six Dominion Experimental Farms in Eastern Canada (1923-30) required 127.4 hours of manual labour and 7.6 hours of horse labour.

The total resources of spruce throughout Canada are estimated at 500,000,000 cords which, if turned into paper, would have a value of \$94,000,000,000.

The application of toxic materials in the form of finely-divided powder was used by the Greeks and Romans who threw ashes, lime, and other materials on plants to protect them from the ravages of disease.

As a source of nitrogen in a fertilizer mixture for tobacco, soybean meal was found to be equal, if not superior, to cottonseed meal. In a recent test at the Dominion Experimental Farm at Harrow, Ont.

As the result of a questionnaire from representative farmers in Eastern Canada it was found that the average annual cost of operating farm machinery was \$2.85 per acre of cultivated land.

For more economical production of crops in Eastern Canada, large sized farms, or a greater area of land under cultivation, would seem to be necessary—Dominion Department of Agriculture bulletin on farm crop costs.

Authorities who have worked specially on the iodine content of waters in relation to the occurrence of goitre have stated that in districts in the Western United States, in which the iodine content of the water is below 0.5 parts per billion, goitre is likely to be quite prevalent.

The original Red Bob selection of spring wheat, as developed by Seager Wheeler, Rosthern, Saskatchewan, and re-selected by him, yielded two outstanding forms to which he gave the names Early Triumph and Supreme. In general appearance these two forms are very much alike.

The value of information given by the Dominion Department of Agriculture respecting the composition and nutritive value of feeds is more and more being put into practice this information leads to a lowering in cost of production of all products on the farm, milk, beef, pork, eggs, etc.

One acre contains 160 square rods, 4,840 square yards, or 43,560 square feet. If the length and width of a field be known, the required width and length to enclose an acre may be found by dividing the known distance in feet into the number of square feet in an acre. The length of a side of a square acre is 208.71 feet.

In the Prairie provinces much interest has been shown in the use of triple superphosphate and ammonium phosphate as a means of increasing crop yields. As yet, the data obtained in this work are insufficient to make any definite pronouncement, but it would appear that under favorable conditions nitrogenous and phosphatic fertilizers, more particularly the latter, may be used to advantage to increase the yields of grain in certain sections of the Prairie provinces—Dominion Division of Chemistry.

## Celebrates Centenary

Sportsmen Started Racing Club In France Hundred Years Ago

Organized horseracing, in France is just one hundred years old, and recently at Longchamps a special race called the Centenary Prize was run. The society came into being in November, 1833, as a result of a sudden storm over Paris which drove a number of sportsmen into a cafe at the Palais Royal. While waiting for the weather to clear up, they discussed racing, and there and then decided to form a racing society. The president was Lord Henry Seymour, about whom plays, films, and novels have been written. The first secretary was Mr. Thomas Bryon, an Englishman, who owned a Paris shooting gallery. The first race-meeting was held on the Champ de Mars, Paris, on May 4, 1834.

## Completes Wonderful Clock

Marvin Shearer, 70-year-old inventor of Akron, O., has completed what he believes is the world's most wonderful clock. The instrument tells the time in 27 large cities, sings, talks, and plays a reelless pipe organ each hour. The clock, valued at \$50,000, took 10 years to build, contains 5,000 pieces of wood and several miles of electric wiring.

Below London is a natural underground reservoir of water stretching about 30 miles north and south of the city and the same distance east and west.

The channel of the ancient Hudson river runs under the sea for many miles, showing that the land was once above the sea.

The United States is represented in 15 foreign countries by ambassadors.

## Because it LASTS and LASTS

The new Lactogen is a complete food for infants. It is made from the purest milk and contains all the vitamins and minerals necessary for the healthy growth of the baby. It is easy to digest and does not spoil. It is the best food for infants.

## YOU'VE HAD "BETTER LUCK"

With Lactogen you can be sure your baby is getting the best food. It is the only food that is as good as the mother's milk. It is the only food that is as easy to digest as the mother's milk. It is the only food that does not spoil.

## OCCASIONAL WIFE

By EDNA BOB WEBSTER  
Author of "Joretta," "Lapetick," "Dino," etc.

## SYNOPSIS

Camilla, Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avia Werth, another wealthy girl who is trying to win Peter. Sylvia Todd, Peter's model, and Gus Matson, his former roommate, with whom he has a falling out. After a party at an exclusive club, where the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip off to the beach by themselves and find each other on the sand. When they awake it is early morning and Avia and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone to the studio, Avia Werth calls and persuades Peter to accept a loan of \$1,000. Peter and Camilla are reconciled. Avia invites them to a party, at which she introduces Peter to well-known artists and public men.

(Now Go On With The Story)

## CHAPTER XLVI

Avia was in her element, the focus of attention in the small room filled with guests. Peter stood beside her, handsome and debonair, happy that his work was finished and well done. Camilla was a spectator; in fact, she stood the farthest from the center of the interest, which was the usual state.

Avia spoke brilliantly, impressively, of her pride in Peter and his work, her hopes for his success, and vouchsafed for the good wishes of these friends of his who were honored to be present at the christening of his first great work.

Camilla's eyes traveled from her illumined face to the modeled group in the window alcove which had been Peter's first gift to her. Nothing he ever might produce could be more precious to her, and she doubted if anything could be much better. She actually believed that it was a better piece of work than the new "Inspiration," but conceded that the latter would probably qualify better as an exhibit entry. Peter had caught the spirit of the thing so admirably in that group, perhaps because it had been inspired by his new love for her and her staunch defense of his ancestry.

Avia concluded, "And it has been my great privilege and honor to give the name to the marvelous piece of art, which I have called 'Inspiration.' With a dramatic gesture she drew the veil from the figure and stood aside. Followed exclamations and compliments. Peter surrounded by the ebullient guests. Even the title was praised, pronounced, Peter by flattering critics who gave little thought either to its significance or originality.

Avia sought and drew approbation like a magnet. It might not be sincere, but it was the purpose of the moment. Flatteries and titles, phrases, patrician and like hall-stones and melted as inconsequence. No one cared particularly about the merits of the sculptured figure, the pertinence of its title or the success of its creator. They were much more intent upon the hilarity which this occasion afforded them and the liquid refreshments which awaited them across the hall.

There was no time lost when they arrived here. Cocktails were passed immediately. Toasts were drunk to the sculptor and to his work, to his success, to the one who had named the statue, to every possible subject—except Camilla. She was as useless as the veil which had shrouded the figure and was cast aside. She had inspired Peter, loved him, urged him to do the work, shielded him from obligations to her, humored his moods, forgiven him harsh and unjust words, sacrificed her personal happiness—and this was her reward.

Avia had intruded where she had no right, had indignantly commanded Peter's favor, usurped the privileges of another—and now shared Peter's momentary triumph as if she belonged to him.

It was Avia with whom he danced first, out of duty and gratitude; Avia who, clinging to his arm possessively and unconsciously, prevented his dancing with the other girls.

Through the rooms were comparatively small; Camilla was not near enough even to speak to him for an hour. She observed, wistfully, the obsequious attention to Avia did not appear to be at all reluctant. But she chided herself for her jealousy and tried to be gay.

When she finally did speak to Peter, desirous of one dance with him, he exclaimed, "It's too warm and crowded in here to wait for me. I've had enough of it. Good! I'm tired, anyway. Here, Terry, take my wife, she wants to dance."

Terry was most obliging, while he made a few calculations of his own. Give the Ansons another year, and he would have her to wait to celebrate when the prize is awarded.

But Peter may not win, then she couldn't give a party! Camilla defended her, for effect.

"That's right, well, any party that gives me a chance to dance with you is okay, anyway. And do me a favor in our crowd? I'm not the only one who does, but I'm at the top of the list."

She laughed with indifference. "It is nice to be missed, but I am much happier now than I ever was, much as I like you all."

"Sure about that?" quizzically.

"Why, of course."

"And what will you do if Peter goes to Paris?"

"I'll wait to decide that when he figures," she laughed, "but I shan't have had time to say yes or no. I shall be very busy with my own work."

Just then Peter danced by her, Avia, ostensibly enjoying himself. His head was inclined close to Avia's, intent upon what she was saying. He laughed, and their eyes met with an intimate air of understanding.

Camilla's heart stood still for a moment, and she felt like a wax figure moving about the room propelled by Terry's arm. He said something that she had not heard of understanding.

"I'm sorry," she apologized.

"I said, how is your work going?"

"Oh, splendidly."

"What do you do, anyway? I know you work for an advertising agency, but what do you do now?"

"Just ad copy," evasively.

"Like it?"

"Immensely."

She was beside Peter again for a moment, but his eyes watched someone across the room. It was Avia, who wore a crown of jewels and other figure as if she were a model in metal. Camilla ventured, "Avia looks lovely, doesn't she?"

He nodded quickly then brought his gaze back to her as if he were seeing her for the first time. "Why didn't you get a new dress for the party?" his tone criticized her black lace of last season.

"Why, I didn't think it was so important. Besides, I haven't had much time for shopping."

"So you don't think the celebration of the birth of my first real work is very important?" he repeated, coolly.

"Oh, of course—I don't mean that way, dear. It's the party that isn't important," she smiled into his eyes, but there was no response. He seemed to be pre-occupied, lighting a cigarette.

Avia hurried up to him. "Give it to me," she requested. "I want time to light one. And come in the other room with me a minute. I have something to tell you that I just heard from Uncle John about the exhibit. Excuse us a moment, but we have a model in wait."

Camilla and took her arm possessively, as he transferred the lighted cigarette from his lips to her heavily rouged ones.

The room blurred for Camilla, whirled dizzily. It must be the heat, or the portion of a cocktail, but drunk—she must get outside. With-out notice, she slipped along the wall to the door and into the hall outside, glanced about her and quietly opened the door into Peter's studio.

She would not be missed if she went in here for a while, where it was cool and dark and she might cry a little to dissolve that horrible aching lump in her throat which threatened to choke her. She could not imagine what was the matter with Peter tonight. He was not himself and she wouldn't let herself be angry with him. She only wanted to be alone for a while to adjust herself and somehow let the evening pass. After that, everything would be all right again.

Peter was only tired and anxious and baffled with an exaggerated sense

of obligation to Avia, who had made him believe she had done a great deal for him. He would see everything straight again after this statement was over and they had had a little time together.

She closed the door and crossed the room to the armchair beside the window, where the immigrant group made a sharp silhouette against the dim light outside. She would not turn on the lights and attract attention from across the hall. With her aching head pressed on her hand, she began to plan for the time ahead all the time she could give to Peter. She would take care of him and let him rest and relax.

There were sounds at the door and it opened presently. Camilla looked up quickly. Avia was whispering to Peter, who stood behind her in the square of light from the hall. Camilla rose from her chair instantly, not trying to overhear what Avia was saying, and just as Peter reached over and turned on the lamp near the door.

As the light illumined the room, each person exclaimed in astonishment when they saw Camilla and instantly, all three cried out at what the lamp-light revealed to them. The bronze figure, "Inspiration," lay in shattered fragments on the floor around the pedestal where they had left it standing so proudly an hour before.

(To Be Continued)

## Haven For Unfortunates

## Strange Cases On Confidential Records Of Shanghai Police

Shanghai, June 15.—"Lost, homeless," such a title seems well justified by many strange stories buried in the confidential files of the Shanghai Municipal Police. For there are many men—and women—who run away from dishonor, heartbreak or marital unhappiness—"lost, homeless," they are now living in Shanghai under fictitious names and assumed identities, with the full knowledge of the police.

Some of the strange cases on file have been revealed by a police official who has given an actual identity. Here are some typical stories.

A wife in England asked the police of Shanghai to find her missing husband, who came here twenty years ago and had not been heard from since then. The police learned that he had been a Shanghai woman's husband for many years and they had a seventeen-year-old daughter. It might be bigamy in England, but the man was living happily with his Shanghai family, so the police informed the wife in England that they could not find her husband.

Then there is the case of a man who was sent to prison in the United States for a minor crime, and friends and relatives deserted him. After his release he came to Shanghai, changed his name and has been an important commercial and social position in that city. A brother tried to find him, but was informed by the Shanghai police that this was impossible.

"Numerous men living in Shanghai to-day," said the police official, "are the victims of their own men's wives. Some of them are now prominent and respected residents, living happily with their stolen mates."

Hundreds of letters are received by the local authorities from England, the United States, Europe and other parts of the world, asking about missing relatives, but the police never reveal secrets unless they obtain specific permission of the person concerned.

**Made Fine Police Dog**

Wolf Cub Trained In Austria Takes International Prize

In the Boanien woods six years ago a wolf cub was growing up to be as big and bad as his parents. But he was caught by a police clerk from Vienna, who saw him while hunting. Today he is Europe's finest police dog. Trained with the dogs in the Austrian police service, the animal took every prize in an international police dog show, making not a single mistake in tests of skill and accuracy.

Two young married English doctors have started a new company—Infant Safe Deposit, Ltd. They will nurse the babies of young married couples who want to go to the cinema.

A word to the wise is said to be sufficient. Ever notice how many words people use in giving you advice?

Flapper (looking nervously at man boy with dog): "Er, don't let him bite me, he's showing his teeth."

Small Boy: "Oh, you can't go by that, miss; you're showing your legs, but I don't suppose you'll kick."

Diner: "This isn't chicken broth, is it?"

Waiter: "It's chicken broth in the water, sir. Made from the water the eggs are boiled in."

Tests made by scientists proved that color sights are as follows: Red and orange stimulate, deep yellow cheers, green has a soothing effect and white induces irritation.

Humans are slow to learn. Hens have been laying stream-lined eggs as long as anyone can remember.

## MAKE YOUR FALSE TEETH HOLD FAST

Let, talk, sing and shout and never fear embarrassment. Your false teeth will hold all day long when you sprinkle them with Dr. Warren's False Teeth Adhesive. They won't slip, they won't fall out, they won't be a nuisance. They'll hold as fast as glue—any day.

## Making Puns On Names

Some That Are Really Clever Have Become Classics

It is generally supposed to be bad taste, as well as bad manners to make jokes about the names which our friends happen to bear; but there are some that lend themselves to punning in a way that is simply irresistible.

Sometimes the owners of the names will themselves crack a witticism on them, as did Charles Kenney, the popular writer, when a piece of cork in his wine went the wrong way. His neighbor at table seeing him coughing and choking, said, "That's not the way for Cork." "But it's the way to kill Kenney," gasped the sufferer. This is a perfect pun.

Another writer whose name was very aptly punned upon was George Bernard Shaw when his play, "You Never Can Tell," was produced. A facetious critic headed his notice of it with the words "You Never Can Be Shaw"—which was not only a good joke but a profound truth.

Some puns upon names have become classics. There is the instance of Thomas Hood when he was twitted with his fondness for the company of that other great humorist, Theodore Hook. "Is it not natural for Hook and I to be always together?" he demanded.

His joke on his own name is likewise immortal. He was very ill, and a too-zealous undertaker called to know if his services would be required. "Don't blame the man," murmured the humorist, "he is only trying to win a lively hood."

A perfect pun upon a name was made by a doctor Brown, who had unsuccessfully courted a lady to be his wife. Called upon to drink her health at a party, the poor man replied, "I've looked her up for years and I can't make her Brown, so I'll give up toasting her."

## Nothing To Bother Him

Some People Will Envy Isolation Of Admiral Byrd

There are moments in life when it would be quite possible to feel envious of Rear Admiral Richard E. Byrd.

For the next seven months this man is going to be just about the most isolated individual on earth. He'll be by himself in a little hut on Little Columbia, and who will be pretty lonely and desolate down there he at least won't have anything to bother him.

He won't, for instance, have to read articles on the merits and demerits of the various modifications of the New Deal. "He'll miss up-counted stories about naggle statters, bathing beauty contests and political campaigns. Door-to-door peddlers will never be able to ring his bell; insurance agents won't be able to open fire on his high boots."

All in all this man Byrd hasn't picked out such a bad spot—San Francisco News.

## Esquimaux's Former Name

Naval Base Known As Iswhoniyah

Twenty Years Ago Esquimaux, the naval base adjoining Victoria, was spelled "Iswhoniyah" 20 years ago although the derivation of that name is unknown. The quaint spelling is shown on an original sketch map of Vancouver Island presented to the province of British Columbia by the governor and committee of the Hudson's Bay Company in London.

The map was drawn by Lee Lewis under the direction of James Douglas, then governor of Vancouver Island. It gives the name "Canacack" for Fort Victoria.

**Coal Petrol For Planes**

Contracts have been let to enable seven squadrons of the Royal Air Force of Great Britain to fly solely on petrol produced from coal. One squadron used this type of fuel during the major part of last year with satisfactory results. Two new plants being established will employ 2,000 men.

Flapper (looking nervously at man boy with dog): "Er, don't let him bite me, he's showing his teeth."

Small Boy: "Oh, you can't go by that, miss; you're showing your legs, but I don't suppose you'll kick."

Diner: "This isn't chicken broth, is it?"

Waiter: "It's chicken broth in the water, sir. Made from the water the eggs are boiled in."

Tests made by scientists proved that color sights are as follows: Red and orange stimulate, deep yellow cheers, green has a soothing effect and white induces irritation.

Humans are slow to learn. Hens have been laying stream-lined eggs as long as anyone can remember.

## Ruling Was Lasting

Speaker Of House Banished Bar From Parliament Hill

A. P. Herbert, the famous "A.P.H." of Punch, a delightfully whimsical character, as Canadian newspapermen who have met him well know, is "having the law" on the kitchen committee of the British House of Commons. It is a reminder of the days, which seem far-off, when we had a bar of our own up on Parliament Hill.

It wasn't much of a bar in size, and didn't have a rail for one's feet, but what it lacked in spaciousness it more than made up in other ways. One might get anything there, from a mint julep to Guinness's stout, and get it at any time from three o'clock in the afternoon until one hour after the rising of the House, which, in those days, might be three o'clock in the morning.

'Twas a great aid to parliamentary eloquence. Many an obscure member and illustrious Demosthenes turned out a fair maiden speech under its inspiration, and many an obstructionist was produced who would have delighted the heart of Parnell.

The well known handwriting on the wall came for it with the Speakership of Dr. Sproule. That most lovable of Speakers, a strong temperance man, objected to the conviviality of the parliamentary Bohemians being carried on so far into the night, especially as the bar was directly over the apartments where he slept, and he was suffering from insomnia. So an edict went forth that the bar must close with the rising of the House, which, truth to tell, was a late enough closing for a bar at any place.

But it wasn't Mr. Speaker Sproule's most popular ruling, and we remember how some of the legislators, resenting this onslaught on their personal liberty, used to get up processions and march up and down before the good Speaker's apartments singing the "Wearing of the Green," they knowing he was a grand Orangeman.

A few years later, and there came prohibition. And the bar never came back—Ottawa Journal.

## Moving Reindeer By Motor

Seven Being Taken From Sweden To French Pyrenees

Seven reindeer are being transferred from Sweden to the French Pyrenees, and it is expected that they will not reach their destination until the end of the month. In charge of two Swedes and a Lapp, who will care for them after their arrival until the experiment of transplanting is completed. The journey is being made in a motor truck, and long stops are made on the way to acclimate the animals to the new climate. How they will thrive in the land of starlit summer nights instead of the silvery twilight of Sweden, is a conjecture. Reindeer once lived in the French Pyrenees, and the experiment is to get them to settle there again. A similar trial was made some years ago, but the long trip was made by boat and train, and the animals died.

## Using Small Potatoes

English Firm Proposes To Make Substitute For Flour

A company is being formed at Ely, England, for the manufacture of farina and dextrose from potatoes. In the past one of the problems of the potato grower has been to find a market for his undersized vegetables, or "smalls." This new factory proposes to utilize them. They will screen the potatoes over a 1 inch ridge.

The new industry will consume 75,000 tons of this year's crop, and after two years will materially increase that figure. Farina, during the war, was used as a substitute for flour. It is still extensively used in the manufacture of foodstuffs.

**Three Ottawa Seats Vacant**

The death of Dr. William Spankie, Conservative member for Frontenac-Addington, created the third vacancy in the House of Commons—all on the government side. North York was left unrepresented by the death of Col. T. H. Lennox and Toronto East by the death of Hon. E. B. Ryckman, former minister of national revenue.

A farmer's idea of bad weather is the kind that goes against the grain.

A wise man is likely to know when he has had enough before he gets it.

## Too Much Urle Auld

A very common cause of Rheumatism, Sciatica, Lumbago, Deranged kidneys allow an excessive amount of uric acid to accumulate. Take Gin Pills to give relief while they are assailing your kidneys to function normally.

Preparing To Film "The Life Of Cecil Rhodes" In South Africa

Biographic or historic films are still the fashion. Victor Saville, well known as director of "I Was a Spy" will very shortly go to South Africa to make "The Life of Cecil Rhodes."

Known as the empire builder because of his pioneer work in that Dominion. On his return from Cape Town, he will make a film from the play "Mary Queen of Scots" starring the British star Madeline Carroll, who is considered a striking likeness of the ill-fated queen.

A new "thermostatic" steel house, embodying the principles of the thermos bottle, has been invented in England.

## Ease Pain, Headache in Few Minutes

1. PEG, I'M FRANTIC, THIS WORK MUST BE DONE—AND I'VE A SPLINTING HEADACHE.

2. LATER. LOOK WHAT I'VE DONE, PEG... ASPIRIN SUITS STORIES THAT ANGRY HEADACHE IN A JIFFY... NEVER FELT BETTER!

DON'T WORRY, GET SOME ASPIRIN TABLETS AND YOUR HEADACHE WILL BE GONE BEFORE YOU KNOW IT...

## For Quick Relief Say ASPIRIN—When You Buy

Now comes amazingly quick relief from headaches, rheumatism, neuralgia, neuritis, headache, or dizziness. The results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. Aspirin Tablet starts to disintegrate almost instantly you swallow it. And this is ready to start the relief.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN's quick relief, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

Does Not Harm the Heart

## Canadian Stamps Auctioned

Exceedingly Rare Specimens Sold For Seven Thousand Dollars

Seven thousand dollars for two little pieces of gummed paper, together less than two inches square. That is what happened at a sale-room in Bond St. W. London, recently.

True, the little pieces of paper are dignified by the name of stamps. They were two of the 1851 issue of Canada, valued 24 cents and bearing a charming portrait of Queen Victoria in her early womanhood.

These stamps, described as "superb in every respect and exceedingly rare," were items in the collection of the late Arthur Hind, of the United States.

The renown of the collection brought buyers and commissions from all parts of the world, and in the saleroom were people whose names are familiar wherever stamp collecting is discussed—Messrs. Stanley Gibbons, F. B. Smith, T. Allen, R. Roberts, L. Aarons, H. Nissen, L. Gill, Johnson and others.

Experienced men of the world thought they are, and doubtless acted on commission for clients, they were as excited as a pack of school-boys about the treasures displayed before their eyes.

Bidding was lively. That for a block of four Newfoundland stamps started at \$1,250, and rose to double that sum.

Then there was what is called as "an immaculate pair" of the violet Nova Scotia stamps, used on an envelope of India with a yellow green. This fetched \$2,300, but a prominent expert said afterwards that many collectors would not consider themselves robbed if they were asked \$2,500 for this lot, because "there is hardly any doubt that another such pair does not exist in the world."

This fetched \$2,300, but a prominent expert said afterwards that many collectors would not consider themselves robbed if they were asked \$2,500 for this lot, because "there is hardly any doubt that another such pair does not exist in the world."

**THE RHYMING OPTIMIST**

By Aline Michaelis

## CHIMING CLOCK

Have you lived where a clock strikes the hours?

So long you no more heard its chime? Have you listened to melody marking The dispassionate passage of time Till it ceased all unheard, past your hearing.

No more noted than heart-beat or breath, Yet its music is part of your living, Its silence is part of your death?

For, though its notes dwindle, unheeded, Yet if one day the chiming should cease, A sudden unrest would besiege you, And would subtly shatter your peace.

Have you lived where a clock chimes the hours So long you no more heard it strike? Then at once you can sense, although dimly, What my living with you has been like!

### INVESTORS NEED

#### EDUCATION, TOO

Legislation is being projected at Ottawa to give more protection for the investor. It is proposed to provide means for going most thoroughly into the pretenses of companies who have bonds or shares to sell to the public. For many this will be an instance of locking the stable door after the horse is taken, but at least future investors will be more properly safeguarded.

In this respect it may fittingly be mentioned that there is something due from the investing public, too. An individual should possess a measure of ordinary common sense and should exercise it when it comes to buying securities. No law can prevent a fool from being stripped of his money. If a person lacks good judgment, nothing Parliament can do in the way of framing legislation can substitute for the absence thereof.

In the ordinary course of events better times will return and there will be ample funds in the hands of people seeking investment. Those people should keep in mind that the safest place wherein they can put their funds brings the lowest interest rate. Those so-called investment funds that carry a high rate of interest, or give promise of spectacular capital increase, must of necessity be classified as speculative, with plenty of possibilities for losses.

Laws can furnish a certain amount of protection for investors, but a widespread educative move to teach people how to handle their surplus funds in a safe manner would be the best preventative against such losses as were incurred in the earlier years of the depression.

#### EDMONTON'S 55th EXHIBITION

JULY 16 to 21

Very few fairs in Western Canada have been in operation annually continuously as long as the Edmonton Exhibition, which on July 16th will open the gates on the 55th annual fair in that city. The Show was first held in two rooms of the Hudson's Bay Company Fort, and later on Fair grounds in the river flats, the present grounds being put into use in 1910.

It is not possible to mention all the interesting classes. The most outstanding are of course those for Horses, Cattle, Sheep and Swine, but great interest is also taken in the competitive classes for grains, and vegetables, flowers, paintings, needlework, cooking and children's school work. A great effort is being made this year to feature One-Farm exhibits, each to include farm produce, grown by farmer living on his farm of not less than 40 acres. The class calls for Alberta-grown fruits, fresh or preserved, canned vegetables, dried vegetables, dried grain, straw, grain, forage plants, honey, cheese and eggs (two of the latter, three will answer), and home cured or

canned meats. Quality and variety are the points upon which the award will be made, only 20 out of the 480 points allowed are being for arrangement, so that competition in this class is not at all a complicated matter, and the prize money is most liberal, starting with \$40 for first prize. Write for free prize list today as entries close June 30th, and plan to holiday in Edmonton Fair week, July 16 to 21.

#### WINTER INJURY

Lacombe Experimental Station. The past winter, although quite mild, was very hard on all overwintered plants such as alfalfa, winter wheat, clover, grasses and bush and tree fruits.

The Dominion Experimental Station, Lacombe, has been receiving a large number of enquiries concerning what the enquirers supposed was disease of or insect damage to currant, gooseberry and raspberry bushes. Investigation has shown that the injury is not due to insects or plant diseases, but is the result of injury.

In a great many cases bushes have not been completely winter killed, but their vigor has been reduced to the point where an abnormal growth is resulting. The bushes are leafing out slowly, with the leaves less than one-third the normal size, and the clusters of fruit bloom are either absent or much reduced in size, giving the impression of a stunted and sickly growth.

Undoubtedly, the fruit crop on such bushes will be much reduced. It still remains to be seen, however, whether these partially winter-killed currant and gooseberry bushes will recover sufficiently during the summer to survive next winter. Where pruning is practised, it would seem wise to remove at least part of the winter injured branches. In the case of raspberries, the partially winter-killed canes should be removed as soon as possible after the fruiting season is over.
